

6 October 2017

SYDNEY METRO NORTHWEST CONSTRUCTION UPDATE – OUT OF HOURS WORKS CABLE STAYED BRIDGE, WINDSOR ROAD, ROUSE HILL

The \$8.3 billion Sydney Metro Northwest is the first stage of Sydney Metro - Australia's biggest public transport project currently under construction and a priority infrastructure investment for the NSW Government. Salini Impregilo has been contracted to build the 4 kilometre elevated skytrain component of Sydney Metro Northwest, including a new cable-stayed bridge over Windsor Road at Rouse Hill.

Please be advised that from **Monday 9 October 2017** and for a period of approximately **three weeks**, out of hours civil works will take place on Windsor Road, Rouse Hill around the cable stayed bridge.

Day works

Day works may be carried out Monday to Sunday between 7.00am – 6.00pm.

Out of hours works

Night works may be carried out from Monday to Sunday between the hours of 6.00pm – 7.00am. It is unlikely that the works will take place every night of the week, it will be dependant on the activity required.

Activities will include:

- Concrete works
- Asphaltting
- Activities to reinstate curb and gutters
- Installation of safety barriers
- Line marking
- Finishing works including grinding, patching, polishing and painting
- Use of light towers to support night time activities
- Traffic controllers to support traffic diversion

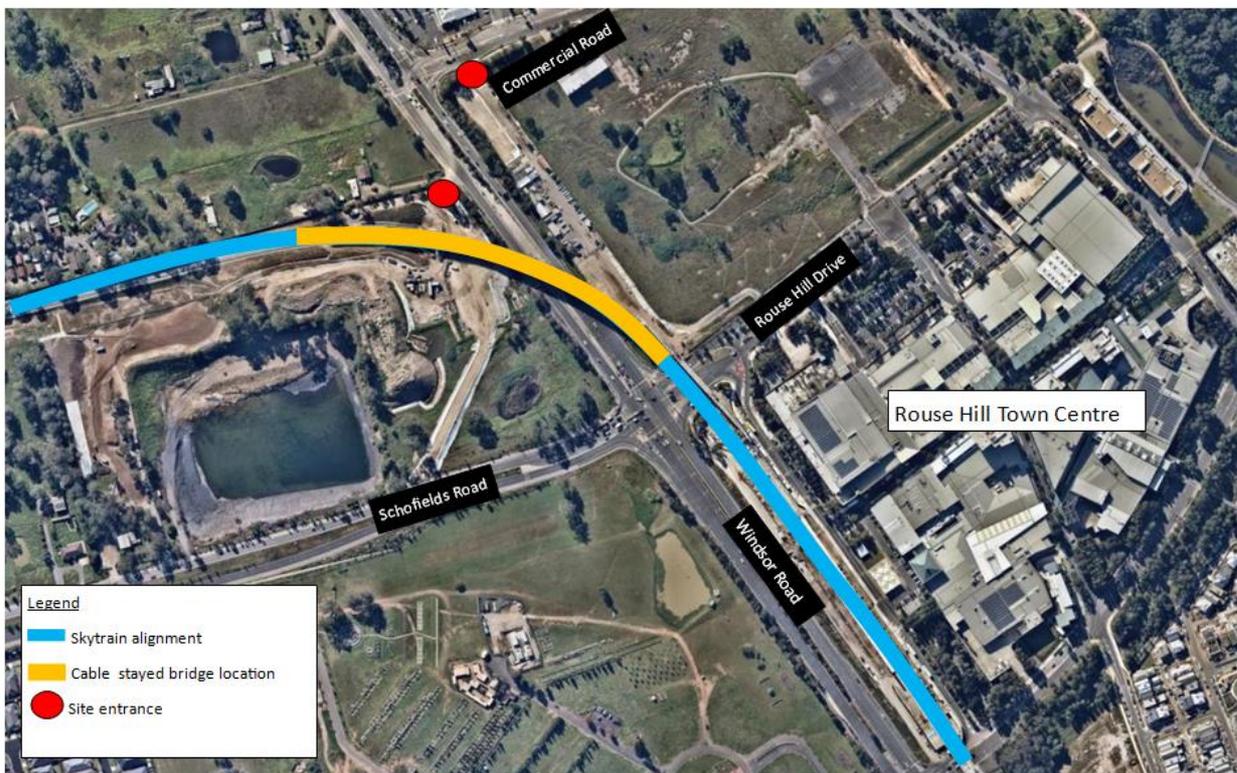

We will manage construction impacts by undertaking the following activities:

- Completing as much work as possible during normal construction hours
- Noise monitoring will be carried out during the first night of works
- Fencing and signage installation to safely enclose the work area
- 'Soft' lighting towers will be used and directed away from residences to reduce light spill impacts
- Reduce noise impacts from general plant and equipment such as non-tonal reversing alarms, turning off plant and equipment when not in use and minimising the simultaneous operation of plant and equipment where possible.

Changes to traffic conditions (during night works) will include:

- To reduce the impacts on motorists some works are undertaken at night when traffic volumes are generally lower
- There will be temporary lane / road closures on Windsor Road between Commercial Road and Rouse Hill Drive
- Pedestrian detours may also be required around the work area at various stages
- Please follow all signage and traffic controller directions at all times
