

3 April 2018

SYDNEY METRO NORTHWEST – OPERATIONS, TRAINS AND SYSTEMS

Cheltenham Services and Community Facilities

Construction update - April to June 2018

The \$8.3 billion Sydney Metro Northwest is the first stage of Sydney Metro – Australia's biggest public transport project. The Northwest Rapid Transit Consortium (NRT) is delivering eight new railway stations, 23km of new track, 4,000 commuter parking spaces and Sydney's new generation of safe, reliable and fully automated metro trains. NRT will deliver this critical infrastructure and operate and maintain it for 15 years.

Construction of the Cheltenham Services Facility is progressing with concrete structure works ongoing, along with fit-out works within the tunnels. The reinstatement of the community facilities including new netball courts, playground and amenities buildings for the sports clubs will commence in April.

For the next **three months**, construction activities at Cheltenham will include:

- Delivery of materials and equipment
- Installation of fencing and hoarding
- Operation of cranes and equipment on site
- Ongoing concrete structure works and civil works
- Building works including block work, drainage works and pavement construction
- Excavation, saw cutting, jack hammering and other general earthworks
- Surveying activities and vegetation removal within the site boundaries
- Continuation of building fit-out works for the services facility.

What to expect:

- Trucks and other vehicles accessing the construction site via the temporary access road on Kirkham Street and a temporary gate to be installed adjacent to the oval
- Construction machinery and equipment operating on site including cranes, trucks, excavators and vacuum excavation trucks
- Construction noise associated with these works
- Street sweepers and water carts sweeping roads and wetting down areas to assist with dust control, as required
- Deliveries of large plant and equipment with some out-of-hours, as required by road authorities
- Lifting materials and equipment into the facility shaft by a mobile crane
- Routine vegetation and weed management within the site boundaries.

What we will do to minimise the impacts:

- Minimise the need for reversing and the use of non-tonal alarms on vehicles and equipment where possible
- Maintain access to Cheltenham Oval, the cricket nets and the current community facilities

- Traffic control personnel will be available to assist with the temporary access gate
- Notify residents and businesses of key activities including any out-of-hours work
- Use water carts and street sweepers to minimise dust as required.

Works will generally occur **between 7am and 6pm Monday to Friday** and from **8am to 1pm on Saturdays**. Low impact activities such as minor finishing works, refuelling of machinery and managing environmental controls may also occur outside of these hours.

Residents and businesses will continue to be notified in advance of ongoing construction activities, changes to traffic conditions and out-of-hours work.

For more information, register for email updates or to make a complaint phone **1800 019 989** (operating 24 hours a day, 7 days a week), email us at trains@metronorthwest.com.au, or visit www.sydneymetro.info/northwest.

Thank you for your patience and cooperation while we carry out this important work.

ABOUT THE PROJECT

- The Sydney Metro Northwest will be delivered as part of Sydney's Rail Future — a customer-focused plan to modernise our trains. Over the coming decades, an extra 200,000 people will move into the region, taking its population above 600,000.
- New automated single deck trains will deliver a fast, safe and reliable service.
- There will be no need for a timetable – customers will just turn up and go, with a train every four minutes in the peak.
- The project includes 15km of tunnels between Bella Vista and Epping, a 4km skytrain viaduct section and the conversion of the existing Epping to Chatswood rail link to the new metro system.

ABOUT THE OPERATIONS, TRAINS AND SYSTEMS WORKS

- Northwest Rapid Transit (NRT) is delivering eight new railway stations, 4,000 commuter parking spaces and Sydney's new generation of metro trains and will operate and maintain the Sydney Metro Northwest
- The works will include:
 - Building eight new railway stations and 4,000 commuter car parking spaces
 - Delivering Sydney's new generation of metro trains
 - Building and operating the stabling and maintenance facility
 - Installing 23 kms of new track and rail systems
 - Converting the existing 13 km Epping and Chatswood line to metro status
 - The operation and maintenance of the Sydney Metro Northwest
