

6 March 2018

SYDNEY METRO NORTHWEST – OPERATIONS, TRAINS AND SYSTEMS Sydney Metro Trains Facility and Cudgegong Road Station construction update – March & April 2018

The \$8.3 billion Sydney Metro Northwest is the first stage of Sydney Metro – Australia's biggest public transport project. The Northwest Rapid Transit Consortium (NRT) is delivering eight new railway stations, 23km of new track, 4,000 commuter parking spaces and Sydney's new generation of safe, reliable and fully automated metro trains. NRT will deliver this critical infrastructure and operate and maintain it for 15 years.

The Sydney Metro Trains Facility and Cudgegong Road Station are now undergoing the final system fit outs. Construction of the commuter car park and installation of landscaping is progressing well.

Work that will be occurring in March & April include:

- Landscaping within, and surrounding both sites
- Installation of signage, light poles, barriers, pavement and outdoor furnishes
- Continue construction of Cudgegong Road bridge, commuter car park, kerbs and footpaths
- Ongoing utility installation at Cudgegong Road Station precinct
- Bulk and detailed earthworks and other general construction activities
- Traffic light installation on Tallawong Road leading into the station precinct street
- Testing and commissioning works
- Site shed demobilisation.

What to expect during these activities:

- Pedestrian and traffic diversions as required in line with road occupancy approvals
- Construction vehicles entering and exiting site via Tallawong Road, Cudgegong Road and Oak Street
- Street sweepers and water carts wetting down areas and sweeping the roads
- Construction noise associated with these works.

What we will do to minimise impacts:

- Implement traffic and pedestrian control measures where required
- Wetting down areas and use of water carts to manage dust as required
- Notify neighbouring residents of upcoming out-of-hours work
- Use of measures to minimise the impacts of noise such as non-tonal reversing beepers.

Most work will generally be carried out between **7am and 6pm Monday to Friday and 8am and 1pm on Saturday**. Low impact activities including: running of generators, general finishing works, preparation work and pouring concrete, refuelling of machinery and managing environment controls have been approved to occur outside of these hours.

To make a complaint, register for email updates or for more information phone **1800 019 989** (operating 24 hours a day, 7 days a week), email us at trains@metronorthwest.com.au, or visit www.sydneymetro.info.

Thank you for your patience and cooperation while we carry out this important work.

ABOUT THE PROJECT

- The Sydney Metro Northwest will be delivered as part of Sydney's Rail Future — a customer-focused plan to modernise our trains. Over the coming decades, an extra 200,000 people will move into the region, taking its population above 600,000.
- New automated single deck trains will deliver a fast, safe and reliable service.
- There will be no need for a timetable - customers will just turn up and go, with a train every four minutes in the peak.
- The project includes 15km of tunnels between Bella Vista and Epping, a 4km skytrain viaduct section and the conversion of the existing Epping to Chatswood rail link to the new metro system.

ABOUT THE OPERATIONS, TRAINS AND SYSTEMS WORKS

- Northwest Rapid Transit (NRT) is delivering eight new railway stations, 4,000 commuter parking spaces and Sydney's new generation of metro trains and will operate and maintain the Sydney Metro Northwest
- The works will include:
 - Building eight new railway stations and 4,000 commuter car parking spaces
 - Delivering Sydney's new generation of metro trains
 - Building and operating the stabling and maintenance facility
 - Installing 23 kms of new track and rail systems
 - Converting the existing 13 km Epping and Chatswood line to metro status
 - The operation and maintenance of the Sydney Metro Northwest
