

## NOTIFICATION – WORK IN THE RAIL CORRIDOR AT LINDFIELD | 24 MAY

Sydney Metro is Australia's biggest public transport project.

Services start in 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations underground at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central.

In 2024, Sydney will have 31 metro railway stations and a 66 km standalone metro railway system – the biggest urban rail project in Australian history. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

### Work in the rail corridor

When Sydney Metro Northwest opens between Rouse Hill and Chatswood in 2019, capacity on the T1 North Shore Line will increase to 20 trains per hour. To enable this increased capacity work is underway between Waitara and Waverton stations, and around Epping Station. Work started in March 2016 and includes signalling and electrical upgrades. Work is also underway between Artarmon and Chatswood stations to prepare for the future connection of Sydney Metro Northwest and Sydney Metro City & Southwest at Chatswood. This work includes signal and electrical upgrades, the removal of existing rail infrastructure and construction of new track and systems.

### Out-of-hours work

Due to the nature of some activities and for the safety of workers, some work will occur outside standard construction hours when trains are not running. Some equipment will also be delivered outside standard construction hours in line with RMS requirements for transporting oversized vehicles.

### Upcoming new work

- **High voltage cable, signalling and communication equipment upgrade work on Saturday 1 June and Sunday 2 June 2019**
  - Work will occur between 7am and 4pm each day. No night work will take place.
  - This work is not expected to be noisy and includes the use of battery powered hand tools and work vehicles.
  - Access will be via Lindfield Substation access gate.

### Ongoing corridor work in standard hours:

Standard working hours are Monday to Friday between 7am and 6pm and Saturday between 8am and 1pm. This work is covered by previous construction notifications, for further information please see the Sydney Metro website.

- Signalling and electrical upgrades including cable pulling and the installation of new overhead wiring, footings, steel structures (masts), and connecting booms on masts between Waitara and Waverton stations (until mid-2019).
- Vegetation trimming or removal as required to make way for construction work and new infrastructure.

### What to expect

- Access to the rail corridor, deliveries and spoil removal will be via the existing gates in Lindfield substation.
- Temporary fencing and hoarding barricades, entrances or exits, gates, lighting, and the like will be installed to provide a safe and secure site.
- Erection of safety and warning signage as required.
- Support sites and compounds may be in use up to 24 hours a day when trains are not running.
- Temporary parking, traffic, and pedestrian changes may be required.

- The project team will minimise noise impacts wherever possible by reducing the number of machines operating at the same time and turning off equipment when not in use.

### Keeping you informed

Properties close to the rail corridor will receive notifications when work is scheduled to occur. Sydney Trains will deliver notifications for work done during scheduled rail maintenance periods and Sydney Metro will keep you informed of all other work. **If you'd prefer to receive updates by email, please contact Alex who can add you to the distribution list.**

If you have any questions or concerns please contact Sydney Metro please call **Alex** on **1800 171 386** (24 hour community information line) or [sydneymetro@transport.nsw.gov.au](mailto:sydneymetro@transport.nsw.gov.au).

**Thank you for your cooperation while we complete these essential works.**
