

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations underground at Martin Place, Pitt Street and Barangaroo and new metro platforms under Central.

In 2024, Sydney will have 31 metro railway stations and a 66 km standalone metro railway system – the biggest urban rail project in Australian history. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

The upgrade of the T3 Bankstown Line to metro standards received planning approval on 19 December 2018.

Bankstown Line metro upgrade

Over the next month early investigation work will continue along the Bankstown line between Sydenham and Campsie stations (weather and site conditions permitting).

Out-of-hours work

Due to the nature of some activities and for the safety of workers and the community, some work will occur outside standard construction hours when trains are not running.

Between **2am Saturday 28 September** and **2am Monday 30 September** work will include installation of new cable routes and bridge surveys in the rail corridor at **Livingstone Road (rail overbridge section), Marrickville**.

What to expect

- Temporary single lane closure at Livingstone Road (rail overbridge section near Marrickville Avenue). Please see map overleaf.
- Increase in light traffic movements around the local area. Traffic control and directional signage will be in place for the safety of workers and the community.
- Equipment such as hand held tools, a cherry picker and a crane will be in use.

Access to buildings and driveways will be maintained at all times. Some of this work may be noisy, however we will take every possible step to minimise noise such as switching off equipment when not in use and installing non-tonal reversing beepers on vehicles.

Keeping you informed

Properties close to the rail corridor will receive notifications when work is scheduled to occur. Sydney Trains will deliver notifications for work done during scheduled rail maintenance periods and Sydney Metro will keep you informed of all other work. If you'd prefer to receive updates by email, please contact us using the details below.

Thank you for your cooperation while we complete this essential work.

If you have any questions please contact **Melanie** on **1800 171 386** (24 hour community information line) or SouthwestMetro@transport.nsw.gov.au
