

Notification – The Bays

23 November 2020

Sydney Metro is Australia's biggest public transport project.

New metro rail will become the fastest, easiest and most reliable journey between the Sydney and Parramatta CBDs. Sydney Metro West will service the key precincts of Greater Parramatta, Sydney Olympic Park, The Bays and the Sydney CBD.

Metro services started in 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. Sydney Metro includes new underground CBD stations at Barangaroo, Martin Place and Pitt Street with new metro platforms under Central.

In 2024, Sydney Metro will have 31 stations on a new 66km standalone metro rail system – the biggest urban rail project in Australian history with ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

Jemena gas main relocation: The Bays

To allow for the future construction of The Bays metro station work needs to be undertaken to relocate a low pressure gas main. The design and construction of this work will be undertaken by Jemena, who will directly notify any affected stakeholders if there are any impacts to supply.

The relocation work will be completed in two stages, with stage one commencing on **Monday 30 November 2020** and continuing for approximately two weeks, weather and site conditions permitting. Stage two is expected to be undertaken in late 2021. We will provide notification before stage two work commences. All work will be undertaken during standard construction hours 7am to 5pm, Monday to Friday and 8am to 1pm Saturday.

Work will involve:

- Utility relocation and drainage work
- Footpath, kerb and driveway construction
- Excavating, clearing and removal/stockpiling of spoil.

What to expect:

- The work will generate some noise and the team will minimise impacts where possible
- Construction machinery and equipment will be operating onsite
- Traffic control and directional signage may be used for the safety of workers and the community
- Watercarts and street sweepers wetting down areas and sweeping roads to assist with managing dust as required.

 Sydney Metro West, PO Box K659, Haymarket NSW 1240

 If you need an interpreter, contact TIS National on **131 450** and ask them to call **1800 171 386**

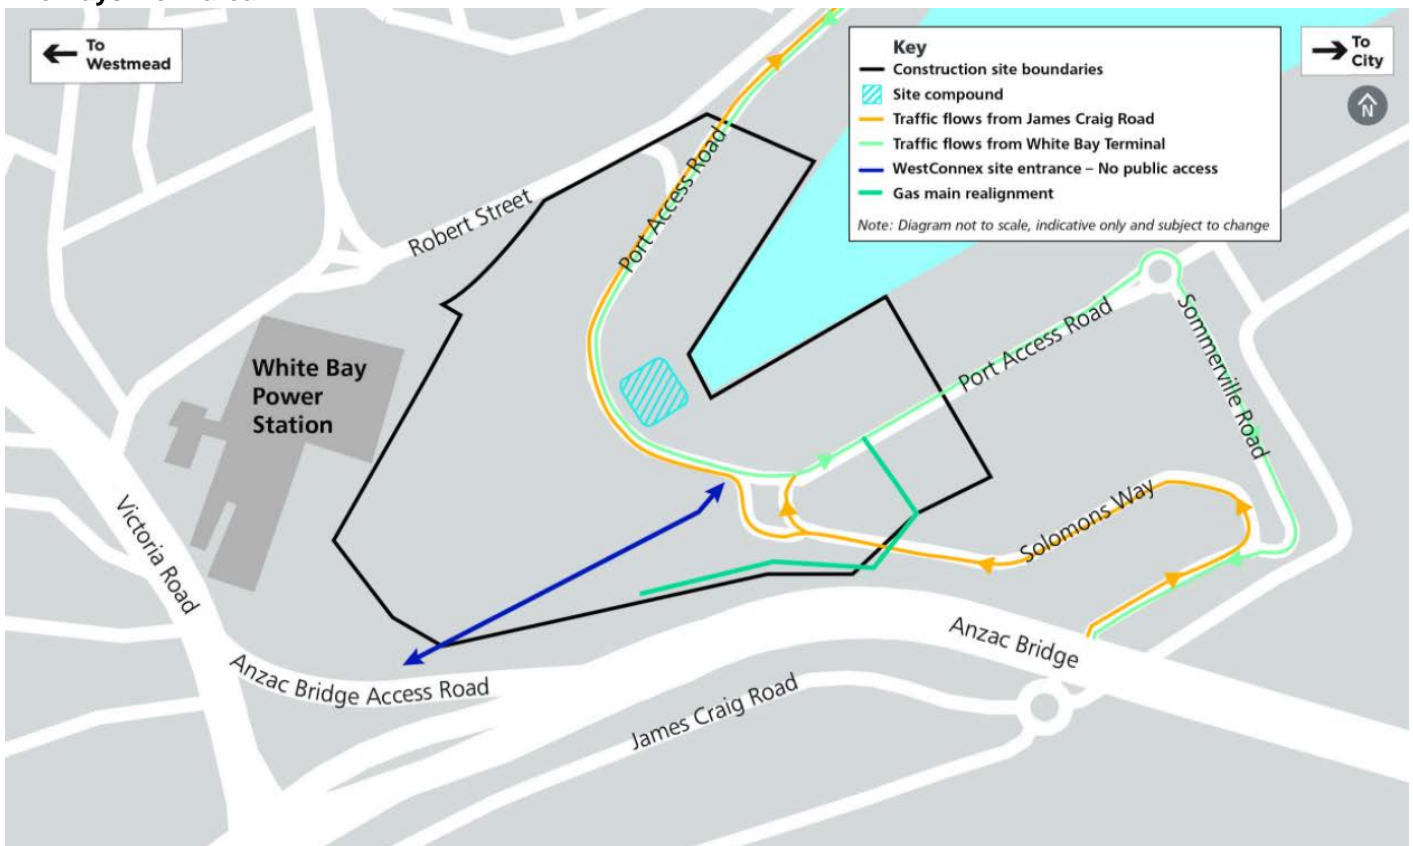

Changes to traffic:

During the work, traffic control will be in place to assist with changes to traffic conditions. This may include temporary and permanent traffic signage, traffic controllers present on the road or partial road closures.

Equipment used:

Equipment used includes but is not limited to; excavators, bob-saws, vacuum trucks, hand tools, temporary fencing, water carts, light vehicles and generators.
