

## **Notification – St Marys**

10 December 2020

**Sydney Metro is Australia’s biggest public transport project.**

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport.

The railway will service the new airport and airport business park, the Western Sydney Aerotropolis, Luddenham, Orchard Hills and St Marys – here customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro - Western Sydney Airport operational when the airport opens for passenger services.

World-class metro rail means better access to more places, faster travel times, less congestion on roads and a reduced reliance on cars. Metro services now connect the city’s North West between Rouse Hill and Chatswood and will be extended into the Sydney CBD and beyond to Bankstown in 2024.

In 2024, Sydney Metro will have 31 stations on a new 66km standalone metro rail system – the biggest urban rail project in Australian history with ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

### **Background noise and vibration monitoring – St Marys**

Sydney Metro is carrying out noise and vibration monitoring in St Marys to assist with the planning and design for the Sydney Metro – Western Sydney Airport project.

Environmental consultants will be noise and vibration logging in the work area for approximately **one day** between **Thursday 17 December and Thursday 24 December 2020**, weather and site conditions permitting.

Noise and vibration loggers do not record conversations or other sounds and your privacy is respected at all times. They log the frequency, duration and intensity of existing noise and vibration in the area. Personnel will carry identification at all times.

Please see map overleaf for the location of the work.

#### **Work will involve:**

- Personnel setting up and attending to noise and vibration loggers on the kerbside to measure noise and ground vibration.

#### **What to expect:**

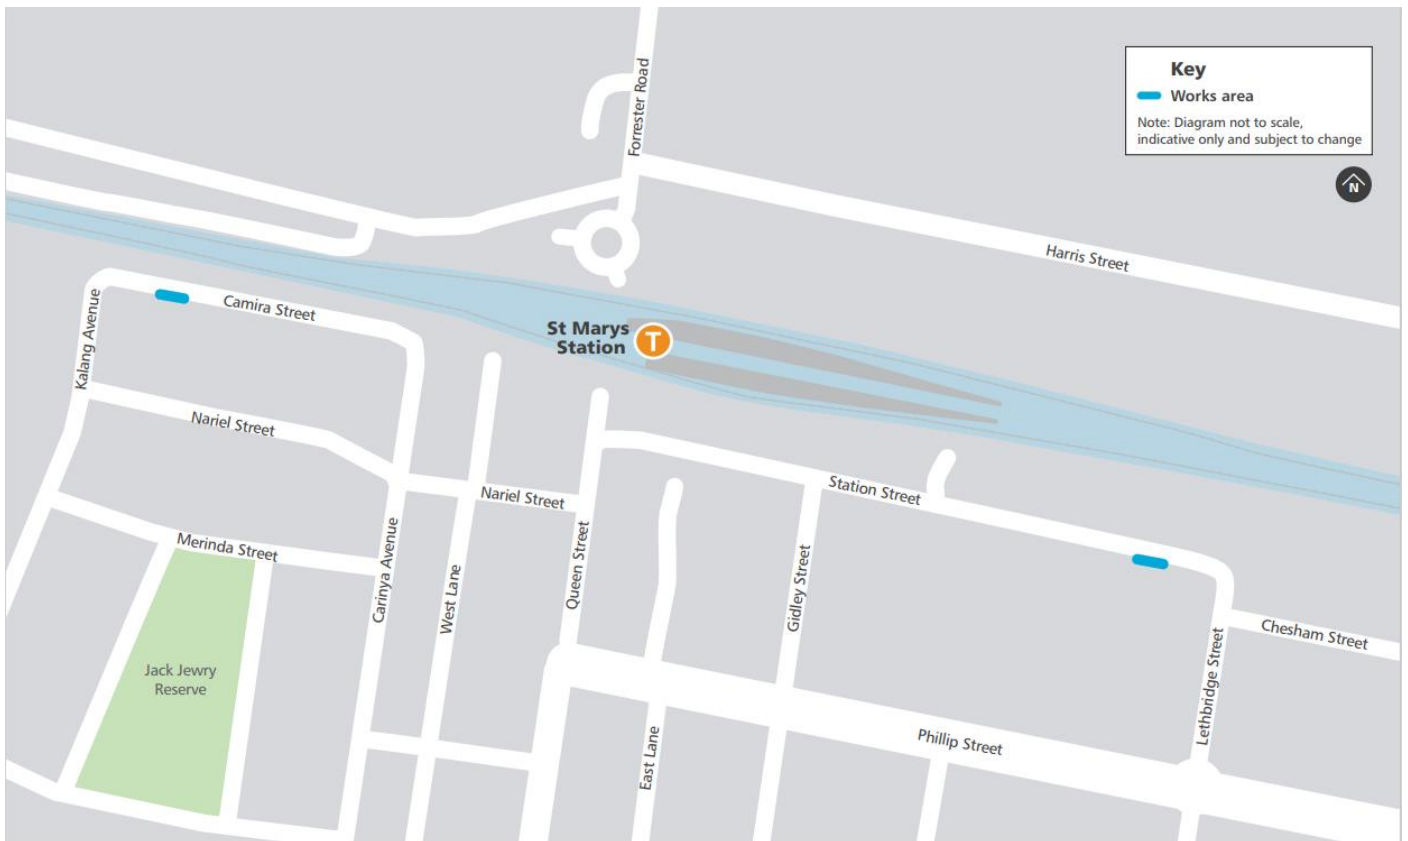

- Kerbside parking may be temporarily restricted in some locations
- Access to driveways, pathways and buildings will be maintained at all times.

#### **Equipment used:**

Equipment used for this work includes but is not limited to: hand held monitoring devices, a mounted tripod and light vehicles.

Work will be completed during standard construction hours 7am to 6pm Monday to Friday. If work is required outside these hours, notifications will be provided in advance.
