

Notification Update – Lilyfield

10 January 2021

Sydney Metro is Australia's biggest public transport project.

New metro rail will become the fastest, easiest and most reliable journey between the Sydney and Parramatta CBDs. Sydney Metro West will service the key precincts of Greater Parramatta, Sydney Olympic Park, The Bays and the Sydney CBD.

Metro services started in 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. Sydney Metro includes new underground CBD stations at Barangaroo, Martin Place and Pitt Street with new metro platforms under Central.

In 2024, Sydney Metro will have 31 stations on a new 66km standalone metro rail system – the biggest urban rail project in Australian history with ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

Site Investigations: Lilyfield

Essential site investigation work is being undertaken by Sydney Metro West. These investigations will assist with planning and inform early design work for Sydney Metro West and the proposed service facility at Lilyfield.

Utility Investigations: Near the Bay Run and Glover Street

Due to pedestrian volumes and to avoid any disruption to the Bay Run, these investigations will be done outside standard construction hours between 6pm and 5am on **Sunday 17 January for up to one week**. The utility investigations on Glover Street will be done on **Monday 18 January for up to one week**, during standard construction hours 7am to 6pm Monday to Friday, and Saturday 8am-1pm, weather and site conditions permitting. Each investigation site may take 2-3 days to complete. Please see map overleaf to inform the locations for these works.

Geotechnical Investigations: Near the Bay Run and Glover Street road verge

This geotechnical investigation work will be done on **Monday 18 January for up to two weeks**, during standard construction hours 7am to 6pm Monday to Friday, and Saturday 8am-1pm, weather and site conditions permitting. Access to the Bay Run will be maintained at all times and the setup for the work will be undertaken outside standard construction hours, to avoid any disruption to the Bay Run.

Work will involve:

- Establishing a temporary site with site fencing
- Removal of concrete and asphalt with bob-saw
- Using a truck mounted drill rig to bore below ground level
- Removing spoil from site using a vacuum excavation truck and taking soil samples
- Excavating trenches and recording underground infrastructure locations.

What to expect:

- The work will generate some noise and the team will minimise impacts where possible
- Access to pathways and buildings will be maintained at all times
- Parking may be temporarily restricted in some locations
- There will be no disruption to the delivery of utility services
- The area will be reinstated at the completion of the work.

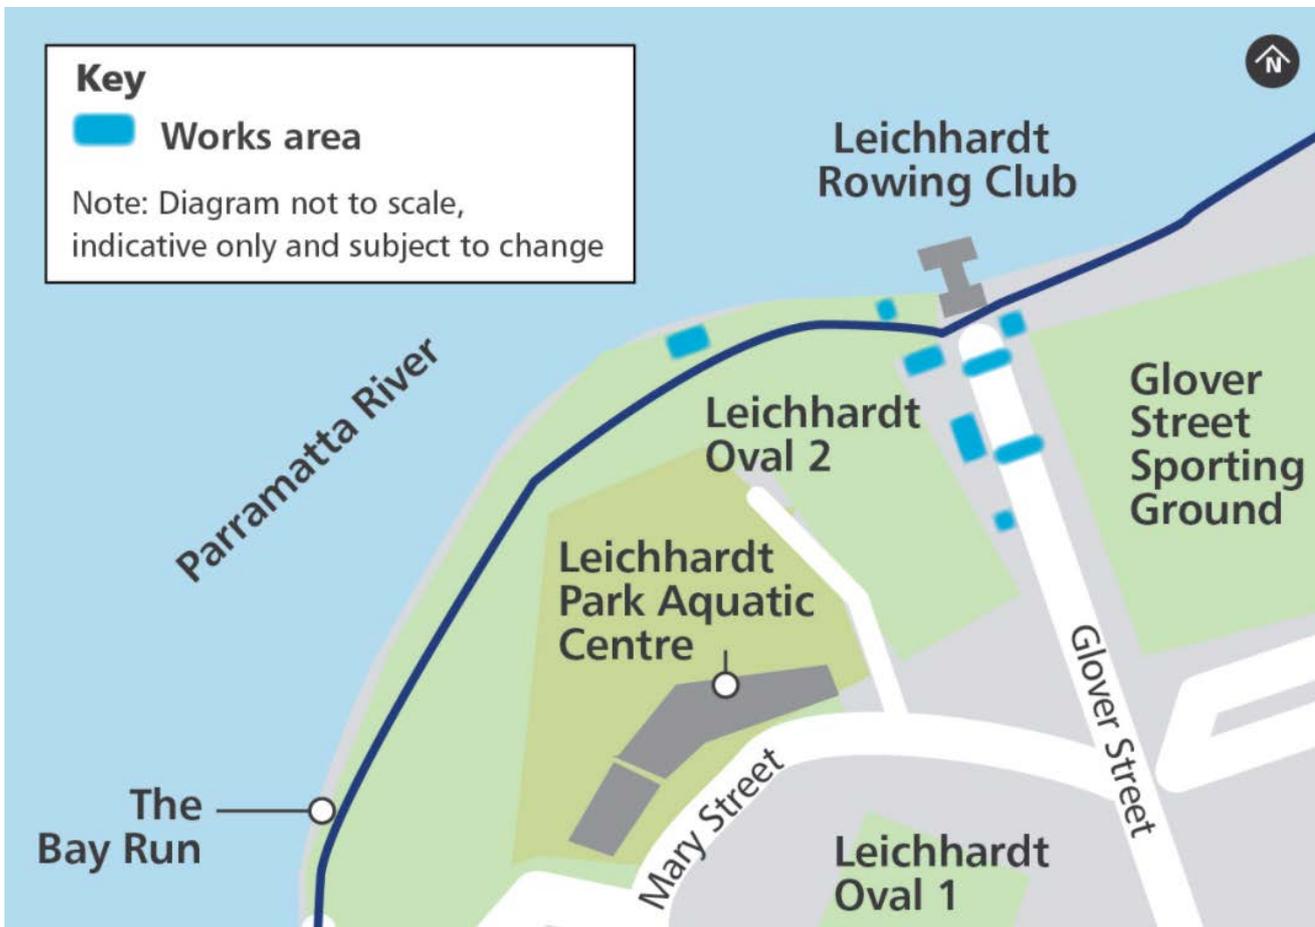

Equipment used:

Equipment used for both day and night work includes but is not limited to; excavators, bob-saws, vacuum trucks, hand tools, temporary fencing, light vehicles, asphaltting machines and generators.

Changes to traffic and pedestrian and cyclist routes:

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists with any changes to traffic conditions. This may include contraflow traffic flow, stop-slow traffic controls, or partial road closures. The times of these changes will vary and are dependent on road authority approvals.
