

Notification – Sydney International Speedway, Eastern Creek

22 January 2021

A new world-class speedway for Western Sydney

The NSW Government is delivering a world class speedway within Western Sydney Parklands' Precinct 5: Eastern Creek Motor Sports which will be an exciting addition to the existing motorsport precinct and create a Motorplex destination for international, national and local racing events.

The new speedway will be a key contributor to the NSW economy and support tourism in Western Sydney, bringing in interstate and overseas competitors, crews and spectators.

Planning approval was granted for construction of the Sydney International Speedway in December 2020 and major works commenced earlier this month. This follows minor works to prepare and establish the work site that started in November 2020.

Speedway construction:

Construction work will continue within the Sydney International Speedway site, the Sydney Dragway site, on Ferrers Road and in the area south of Ferrers Road known as Pipeline Park. See map overleaf for work locations.

Work will be undertaken during standard construction hours of Monday to Friday 7am to 6pm and Saturday 8am to 6pm.

Over the coming months, some work will take place outside of standard construction hours, between 6pm and 7am Monday to Friday, 6pm Friday to 8am Saturday and 6pm to 8pm Saturday.

Out of hours work may include general construction activities such as earthworks, movement of materials within the site, structural works and delivery of materials to and from the site.

Noisy works or works which have the potential to impact the community will only be undertaken during standard construction hours. Any residents or businesses in close proximity to the work will be specifically notified of the out of hours activities.

Work activities will involve:

- Site clearing and removal of trees and scrub
- Construction of car parks
- Utility work within car parks and speedway area
- Excavation, earthworks and movement of spoil
- Safe removal and handling of asbestos
- Structural works to build the new speedway.

What to expect:

- This work will generate some noise but impact is expected to be minimal
- Increased truck movements can be expected during this time.

Changes to traffic:

During these works traffic control and directional signage will be in place to assist motorists, pedestrians and cyclists. This may include temporary partial road closures. The times of these changes will vary and are dependent on road authority approvals.

Equipment used:

Equipment used for this work includes but is not limited to: excavators, dozers, scrapers, graders, compactors, dump trucks, cranes road trucks, mulchers, water cart, street sweepers, concrete trucks and pumps, and lighting towers.

Sydney International Speedway work area:

Next steps:

Construction of the Sydney International Speedway is expected to be completed in late 2021. We will continue to provide the community and stakeholders with further updates as the project progresses.

Contact us:

Your local Place Manager for the Sydney International Speedway project is Tara Larkin. Tara will be your main contact for questions and enquiries regarding the project and can be contacted on 1800 612 173.

Thank you for your cooperation while we complete this work.
