

13 March 2017

SYDNEY METRO NORTHWEST OUT OF HOURS WORKS – BALMORAL ROAD, KELLYVILLE

The \$8.3 billion Sydney Metro Northwest is the first stage of Sydney Metro - Australia's biggest public transport project currently under construction and a priority infrastructure investment for the NSW Government. Salini Impregilo has been contracted to build the 4 kilometre elevated skytrain component of Sydney Metro Northwest, including a new cable stayed bridge over Windsor Road at Rouse Hill.

From early March 2017, and for a period of approximately one month, ISJV proposes to undertake out-of-hours construction activities around Balmoral Road and Old Windsor Road.

Construction activities will occur between 7.00am to 6.00pm Monday to Friday and between 8.00am to 5.00pm on Saturdays. Some activities will be carried out at night when traffic volumes are generally lower. Night works occur between the hours of 9.00pm to 5.00am. Residents will see increased lighting at night and may experience noise associated with construction during these activities. Every effort will be made to minimise the impacts of construction on local residents.

The works will include:

- Traffic signals and signs
- Street lighting
- Utilities
- Line marking
- Minor civil works

We will manage impacts by undertaking the following activities:

- Using light towers with light directed away from residents
- Fence and signage installation to safely enclose the work area
- Use of measures to minimise the impacts of noise such as non-tonal reversing alarms
- Traffic and safety signage to alert motorists of changed traffic conditions
- Completing as much work as possible during day time hours to minimise night works
