

Notification – Rodd Point

17 November 2021

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West - a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Sydney Metro was granted planning approval to construct twin underground rail tunnels between Westmead and The Bays for Sydney Metro West in March 2021.

Acciona Ferrovia Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations.

Geotechnical investigation work: Heath Street, Rodd Point

The tunnelling contractor, AFJV, is undertaking site investigations and early work to prepare for construction which is due to start in January next year.

Geotechnical investigation work will be carried out in **Heath Street, Rodd Point** from **Wednesday 24 November 2021** and is expected to continue for **up to ten (10) days** (weather and site conditions permitting) during standard construction hours:

- Monday to Friday 7am – 6pm and Saturday 8am – 1pm

Geotechnical testing will be undertaken to gather information about underground rock and soil conditions to inform engineering design and construction planning (see map overleaf).

The safety of the community and our workforce is our top priority. All work will be undertaken in line with NSW Public Health Orders, using a range of COVID-safe measures and plans.

The work will include:

- Site set-up including installing safety fencing around the work area which will be located in the roadway
- Drilling a small diameter hole around 45 metres deep to extract rock core samples for scientific analysis
- Reinstating the site when work is completed

What to expect:

- There will be some noise associated with this work, however noise curtains will be used on fencing to minimise disturbance
- Temporary removal of three (3) on-street parking spaces for the duration of the work
- While Saturday work is approved it will only occur if necessary due to weather delays
- Property access will be maintained at all times

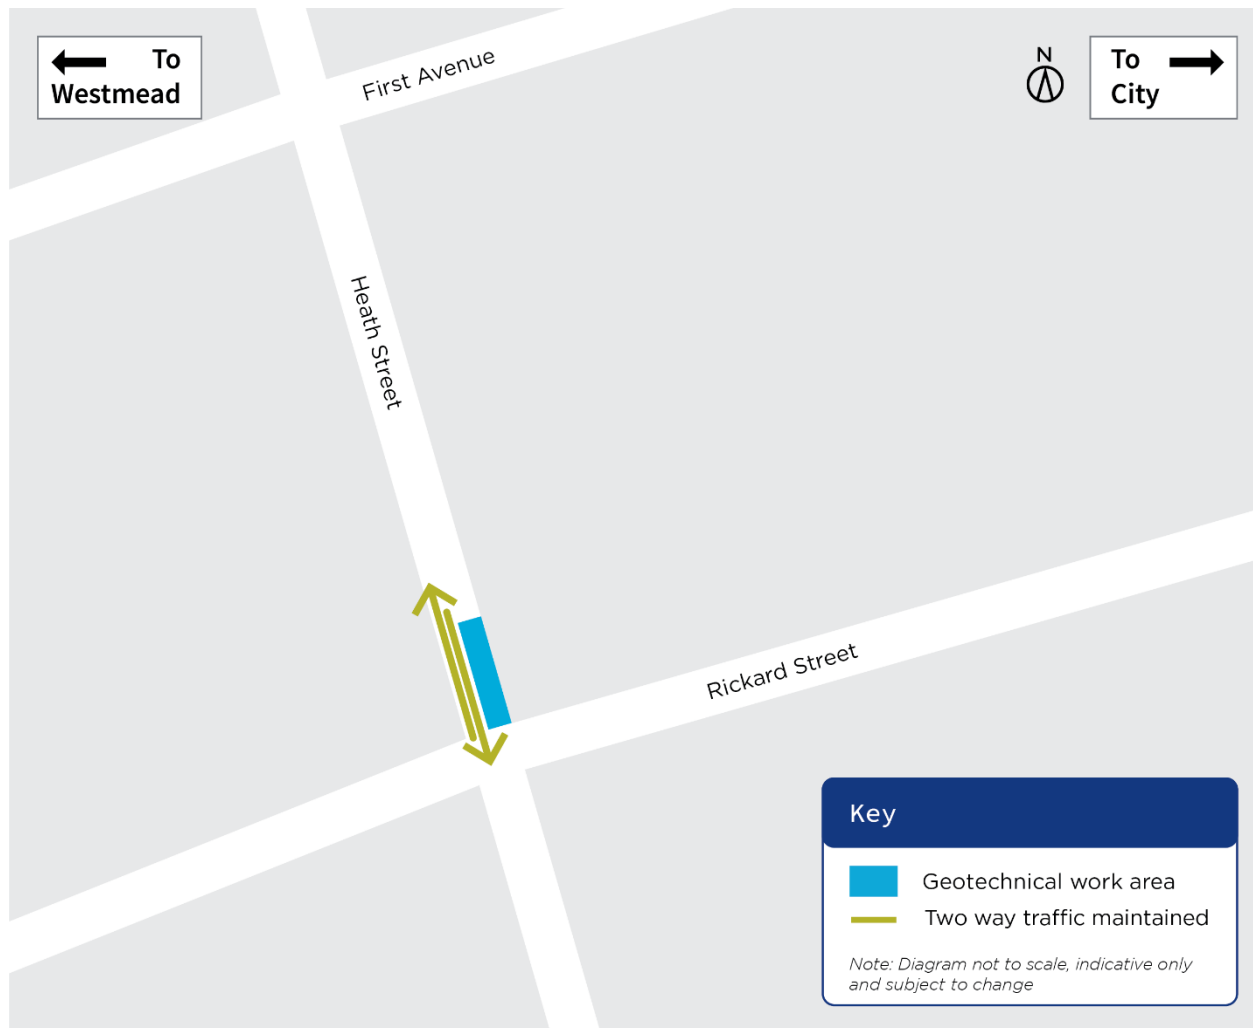

Equipment used:

Equipment used for this work includes but is not limited to: truck or track mounted drilling rigs, small trucks, light vehicles, small concrete mixers and hand tools.

Changes to traffic, pedestrian and cyclist routes:

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists. Two-way traffic will be maintained around the work site at all times but there may be minor delays during site set up and deliveries.

Rodd Point geotechnical investigation work area

Contact us:

Please contact Jeremy from the AFJV community team on 1800 612 173 if you have any questions about the project. We will continue to keep you updated on the progress of work in your area. If you would prefer to receive updates by email, please send a request to metro tunnelsAFJV@transport.nsw.gov.au and we will add you to the distribution list.

Sydney Metro has launched Sydney Metro Connect - a new way to stay informed. You can download Sydney Metro Connect on the App Store or get it on Google Play.

Thank you for your cooperation while we complete this essential work.
