

# Project update – Campsie transformers lift

January 2022

Sydney Metro is Australia’s biggest public transport project.

Services started in May 2019 in the city’s north west with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations underground at Martin Place, Pitt Street, Barangaroo, and new metro platforms at Central Station. In 2024, Sydney will have 31 metro railway stations and a 66 km standalone metro railway system – the biggest urban rail project in Australian history. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

Systems Connect (an unincorporated joint venture between CPB Contractors and UGL Limited) is delivering line-wide work including installing metro rail track, power systems and infrastructure to turn the excavated tunnels into a working railway between Chatswood and Sydenham. Line-wide work also includes the permanent systems, services and buildings required for Sydney Metro operations between Chatswood and Bankstown.

## Lifting the substation modular buildings into place

Systems Connect will continue to install the new substation at Lillian Street, Campsie. We will be lifting two rectifier transformers, built offsite, into place between **11pm on Thursday, 6 January and 5am on Monday, 10 January 2022** or until the work is completed, whichever comes first.

Work to install the transformers into the substation will involve building a crane, delivering the transformers on heavy vehicles, lifting the transformers into place, and dismantling the crane.

In order to lift the transformers into place, access to Lillian Street between Carrington and Dewar Streets will be limited to local traffic only, except for those properties where the crane will be directly outside. More information on traffic changes is included on the map over the page.

These changes are needed to enable the arrival of large vehicles and for the installation of the transformers. These deliveries will arrive outside of standard construction hours.

Other contractors will be using Lillian Street during this time.

We will be using the following machinery: a large crane, a pick and carry crane with semi trailers, an elevated work platform, two low loader trucks, support trucks for the crane, lighting towers and construction vehicles.

<b>Rectifier transformer lift at Campsie</b>	
<b>11pm Thursday 6 January to 5am Monday 10 January 2022</b>	
<b>Location</b>	<b>Detail</b>
On Lillian Street between Carrington and Dewar Streets	<p>Work activities include but not limited to:</p> <ul style="list-style-type: none"> <li>• Establishing temporary traffic management during work.</li> <li>• Setting up safe working areas with barriers and fencing around the sites or equivalent.</li> <li>• Establishment of a large crane within the work area.</li> <li>• Lifting rectifier transformers from the back of low loader trucks into final position.</li> <li>• Maintenance and/or necessary task/work to facilitate the work.</li> <li>• Demobilising a large crane and return to normal traffic arrangements.</li> </ul>

## We would like to talk to you

We will consult with local residents and businesses regarding individual impact. **If you live in one of these streets and need access to local roads that are closed during our work, or would like access to alternative parking, please contact the project team at [linewidemetro@transport.nsw.gov.au](mailto:linewidemetro@transport.nsw.gov.au)**

## Map of the work area

## Keeping you informed

To keep up to date about the substations and power cable work, please register for email updates. Send your details to [LinewideMetro@transport.nsw.gov.au](mailto:LinewideMetro@transport.nsw.gov.au), or call us on **1800 171 386**. Thank you for your cooperation while we complete this essential work.
