

# Project update – Dulwich Hill substation on-street work

January 2022

## Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's north west with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations underground at Martin Place, Pitt Street, Barangaroo, and new metro platforms at Central Station. In 2024, Sydney will have 31 metro railway stations and a 66 km standalone metro railway system – the biggest urban rail project in Australian history. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

Systems Connect (an unincorporated joint venture between CPB Contractors and UGL) is delivering line-wide work including installing metro rail track, power systems and infrastructure to turn the excavated tunnels into a working railway between Chatswood and Sydenham. Line-wide work also includes the permanent systems, services and buildings required for Sydney Metro operations between Chatswood and Bankstown.

## Substation delivery and construction work

Systems Connect is installing a new substation at Randall Street, Marrickville, which means delivering two modular buildings to be lifted into place between 6 and 10 January 2022. The modular buildings have been built offsite and will be transported by an oversized delivery to their final destination at Randall Street.

## Oversized vehicle route and related street furniture work

The oversized vehicles will travel at night along Canterbury Road, citybound, then onto Old Canterbury Road, Railway Terrace, and Livingstone Road until it reaches Randall Street, Marrickville.

Minor road signs will need to be temporarily removed along the route to provide clearance for the oversized vehicles. These will be from Old Canterbury Road at Henson St intersection to Livingstone Road at Randall St intersection, including the temporary removal of median signage on the refuge island.

To ensure the oversized vehicle and load successfully reach the site, outages to power, phone, and internet services will temporality occur. Impacted residents will be contacted by their providers and given further details.

In order to allow us to complete the work safely, a power outage is required on **Saturday 8 January**. If you are affected, you will be notified by Ausgrid.

**Up to 3 night shifts** will be needed to complete the traffic adjustments and then reinstate the signs following the installation. The road work will be completed in stages between **Monday 3 January and Saturday 8 January 2022 from 7pm to 5am**.

## Temporary parking changes

As shown on the map over the page, parking along sections of Randall Street and Livingstone Road will be temporarily removed to allow the oversized vehicle access between **11pm on Thursday 6 January and 5am on Monday 10 January 2022** or until the work is completed, whichever comes first.

Equipment used for all of the above work will include various powered hand tools and light vehicles. Some work may be noisy and every step will be taken to minimise noise such as switching off equipment when not in use, using noise barriers wherever possible, and non-tonal reversing beepers. Where lights are required, they will be directed away from residences.

Changes during the work may include potential delays to property access as work progresses and temporary loss of street parking. Driveway access will be maintained. During these changes, detour signs will be in place to direct motorists and pedestrians. We will liaise with directly impacted residents close to Randall Street as work progresses.

## Map of the work area

## Keeping you informed

To keep up to date about the substations and power cable work, you can register for email updates. Please send through your details to [linewidemet@transport.nsw.gov.au](mailto:linewidemet@transport.nsw.gov.au), or call us on **1800 171 386**. Thank you for your cooperation while we complete this essential work.
