

Notification – Parramatta

3 May 2021

Sydney Metro is Australia's biggest public transport project.

New metro rail will become the fastest, easiest and most reliable journey between the Sydney and Parramatta CBDs. Sydney Metro West will service the key precincts of Greater Parramatta, Sydney Olympic Park, The Bays and the Sydney CBD.

Metro services started in 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. Sydney Metro includes new underground CBD stations at Barangaroo, Martin Place and Pitt Street with new metro platforms under Central.

In 2024, Sydney Metro will have 31 stations on a new 66km standalone metro rail system – the biggest urban rail project in Australian history with ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

Utility investigation: Parramatta (Out-of-hours)

Essential utility investigation work is being undertaken by Sydney Metro West. This work is required to determine the location of underground infrastructure and assist with planning and design surrounding the proposed station at Parramatta.

Due to traffic volumes on George and Smith Streets, these investigations will be done outside of standard construction hours commencing on **10 May for up to ten weeks**, weather and site conditions permitting. Work is being done Sundays to Thursdays between 6pm and 4am. Please see map overleaf for the locations of these works.

Works will involve:

- Establishing a temporary site with site fencing
- Identifying underground infrastructure with ground penetrating radar
- Removal of concrete and asphalt with bob-saw
- Removing spoil from site using a vacuum excavation truck
- Excavate small areas to confirm and record underground infrastructure locations
- Backfilling and reinstating the excavated area.

What to expect:

- The work will generate some noise and the team will minimise impacts where possible
- Parking may be temporarily restricted in some locations
- There will be no disruption to the delivery of utility services
- Traffic control and directional signage may be used for the safety of workers and the community
- Access to pathways and buildings will be maintained at all times.

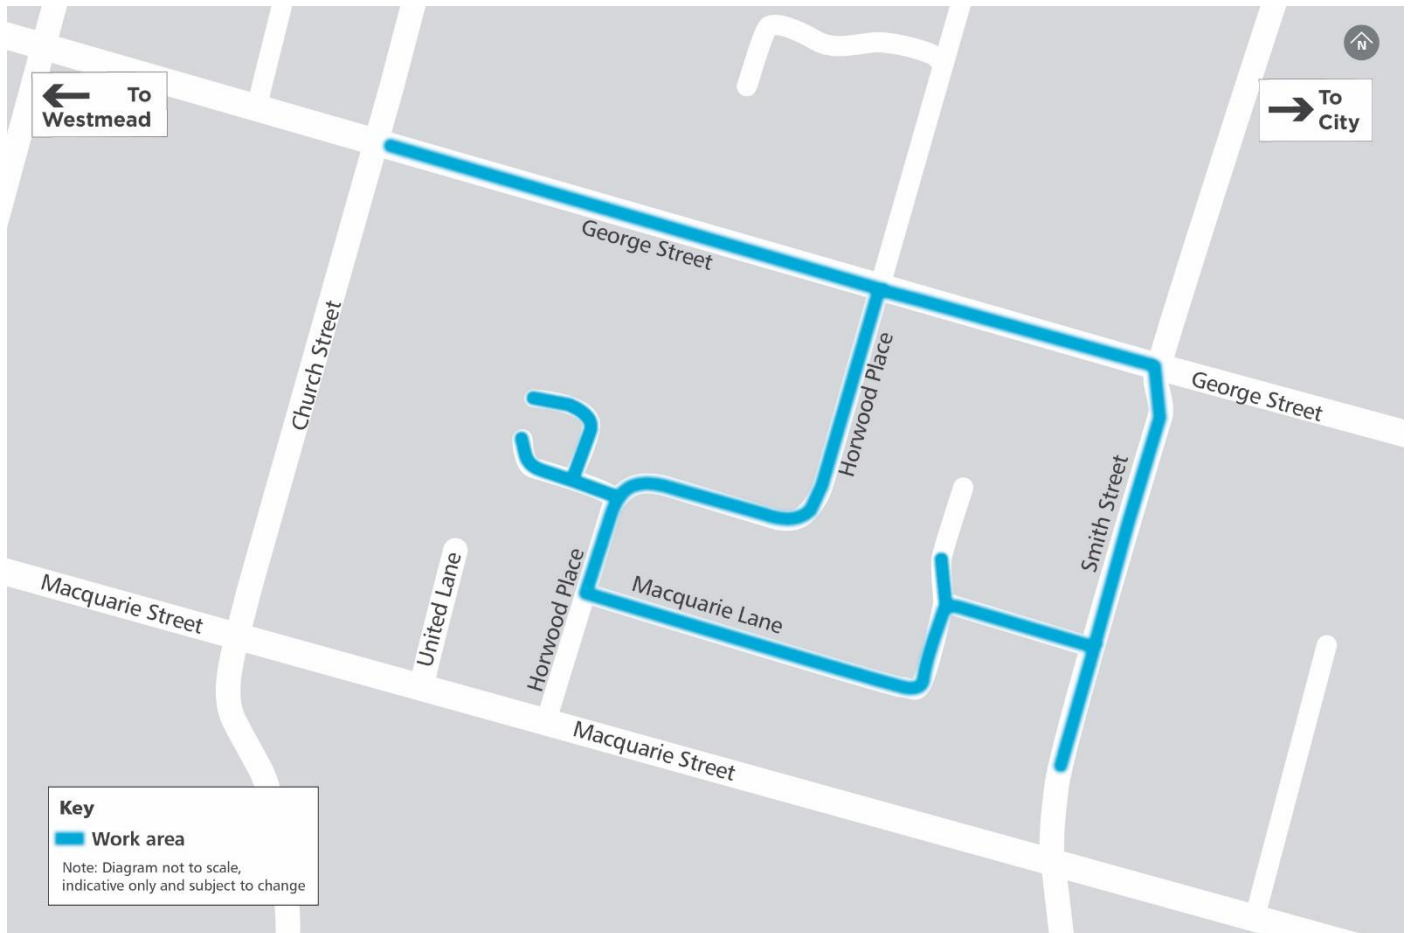

Equipment used:

Equipment used for night work includes but is not limited to; excavators, bob-saws, vacuum trucks, hand tools, temporary fencing, survey equipment, light vehicles, asphaltting machines and generators.

Changes to traffic, pedestrian and cyclist routes:

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists with any changes to traffic conditions. This may include contraflow traffic flow, stop-slow traffic controls, or partial road closures. The times of these change will vary and are dependent on road authority approvals.

Parramatta work area

Contact us:

Your local Place Manager for Sydney Metro West at Parramatta is Vanessa Lum. Vanessa will be your main contact for questions and enquiries regarding the project and can be contacted on 1800 612 173.

If you would prefer to receive updates by email, please contact Vanessa who can add you to the distribution list. Our email is: sydneymetrowest@transport.nsw.gov.au

Thank you for your cooperation while we complete these essential works.
