

Notification – Bringelly

27 April 2022

Sydney Metro is Australia's biggest public transport project.

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport.

The railway will service the new airport and airport business park, the Western Sydney Aerotropolis, Luddenham, Orchard Hills and St Marys – here customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

The Sydney Metro – Western Sydney Airport project has received planning approval from both the Australian and NSW Governments and construction started in 2020. Major construction, including station excavation, is set to start in late 2022.

The safety of the community and our workforce is our top priority. All works will be undertaken in line with Public Health Orders, using a range of COVID-safe measures and plans. We will continue to keep the community updated about any further changes to Sydney Metro construction activities.

Power supply work: Bringelly

Power supply works at Bringelly began in mid-February 2022. Quickway has been awarded the contract to install dedicated power supply routes from nearby existing substations or overhead cables to newly installed power kiosks at Sydney Metro construction sites.

Work will start from Wednesday 4 May, and continue for up to **eight weeks**, weather and site conditions permitting and pending NSW Public Health Advice.

Work will include:

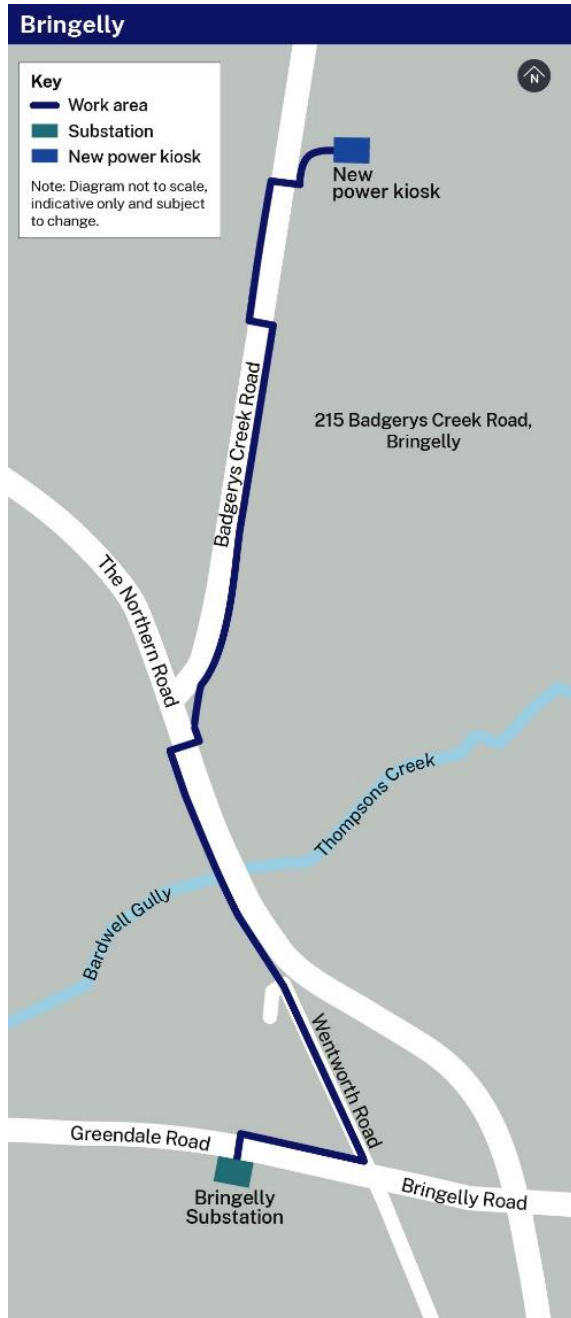

- Site, geotechnical investigations and trenching works on the road verges of Greendale, Wentworth, and The Northern Roads, and work on Badgerys Creek Road to locate and assess the condition of existing utilities and conduits
- Installation of a new power kiosk at 215 Badgerys Creek Road
- Trenching on the eastern road verge of Wentworth Road to install conduits
- Reinstating the work area, once work is complete.

What to expect:

- Work will generate some noise during construction hours and our team will minimise impacts, where possible
- Work will generate dust and our team will minimise this by using water trucks, where possible
- Vegetation removal
- Increased vehicle movements on surrounding roads
- Access to driveways and buildings will be maintained at all times
- There will be no disruption to utility services.

Equipment used:

Equipment for this work includes but is not limited to: excavators, cranes, trucks including delivery, vacuum and water trucks, under boring equipment, cable trailers and light vehicles.

Changes to traffic and pedestrian and cyclist routes:

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists with any changes to traffic conditions. This may include contraflow traffic flow, stop-slow traffic controls, or partial road closures. The times of these changes will vary and are dependent on road authority approvals.

Contact us:

Your local Place Manager for Sydney Metro – Western Sydney Airport is Catherine Ryan. Catherine will be your main contact for questions and enquiries regarding the project and can be contacted on 1800 717 703.

If you'd like to receive these updates by email, please contact Catherine who can add you to the distribution list. Our email is: sydneymetrowsa@transport.nsw.gov.au

Thank you for your cooperation while we complete these essential works.
