

Notification – Canterbury

May 2022

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations underground at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central.

In 2024, Sydney will have 31 metro railway stations and a 66 km standalone metro railway system – the biggest urban rail project in Australian history. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre. The upgrade of the T3 Bankstown Line to metro standards between Sydenham and Bankstown received planning approval on 19 December 2018.

In May, work will continue along the corridor and Canterbury station (weather and site conditions permitting). Work will be undertaken **Monday to Friday 7am-6pm and Saturday 8am-6pm**. All work activities are subject to relevant approvals and will be tailored to the evolving Covid-19 situation at the time.

As a result of industrial action at Sydney Trains, a range of planned activities that require power isolation along the Bankstown Line have been postponed. This work will be rescheduled for a future rail shutdown.

Location	Details of work during standard construction hours (daytime)
Canterbury (along the rail corridor)	<ul style="list-style-type: none"> • Site investigations and surveys including (but not limited to) non-destructive digging, soil assessments, geotechnical investigations and surveys for drainage, utilities, and fencing • Removal of trees and vegetation throughout the rail corridor where required • Installation of fencing, cables and cable service route work (galvanised steel troughing) • Delivery of construction plant and material including associated activities to prepare for upcoming work • Modification works to bridges along the alignment including Wairoa Street Bridge and Melford Street Bridge including temporary changes to traffic on the following streets: <ul style="list-style-type: none"> ○ Temporary lane closures will continue along Wairoa Street between South Parade and East Parade for a period of four (4) weeks ○ Temporary lane closures along Melford Street Bridge between Canberra and Hutton Streets.
Around Canterbury station	<ul style="list-style-type: none"> • Investigations, relocating, upgrading and installing above-ground and underground services and electrical conduits, and installing protective coverings for live electrical services. • Renovating existing station buildings and electrical work at station office • Concrete work on platforms and existing platform buildings • Service investigation and identification along Broughton and Charles streets, and Canterbury Road • Concourse civil and paving work, including adjustment of Opal reader arrangement at concourse • Civil work on Broughton Street including kerb and gutter work and for the new bus shelters. From time to time, there will be a periodic footpath and lane closure, with signage and traffic control in place • Work at the metro services building on Charles Street, including excavation (and removal of excavated material), sewer work, earthwork, installation of drainage and combined services route, concreting work and installation of soil nails. From time to time, there may be a single lane closure, with traffic controls in place • Sewer work, earthwork and installing drainage system for the metro services building.
Former Bowling Club	<ul style="list-style-type: none"> • Continuing site setup activities • Temporary parking impacts on Close Street • Installation of temporary footpath at the rear of the Metro site compound.
Substation site off Hutton Street	<ul style="list-style-type: none"> • Site mobilisation and tree and vegetation removal where required • Excavation including jack hammering and rock saw cutting • Installation of conduits and drainage, formwork reinforcement and concrete pouring • Traffic changes and traffic controllers on Hutton Street to facilitate excavation and truck movements. • Installation of precast concrete footings and structural steel for façade. • Installation of switchrooms, transformers, cables and cable supports, and perimeter columns.

From time to time we may finish work later than 6pm as we complete concrete pours. This will entail finishing off poured concrete using manual and powered floats and may continue until 10pm. This may occur on up to four separate evenings during the month. The noise impact will be low.

Out-of-hours work

Due to the nature of some activities and for the safety of workers, some work will occur outside standard construction hours when trains are not running. Some equipment will also be delivered outside standard construction hours in line with Transport for NSW requirements for the movement of oversized vehicles. Properties in proximity to scheduled work will be notified prior to work starting. Planned out-of-hours work following the shutdown are detailed in the table below.

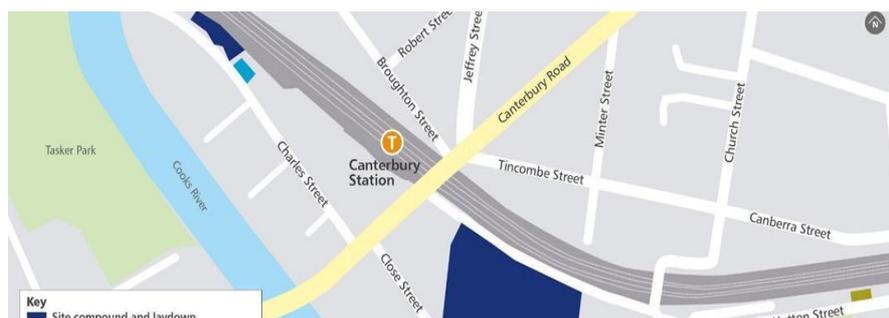

Date / time	Details of out-of-hours (including night) work
<p>Mid-week between 6pm and 7am Monday 2 May to Friday 3 June 2022 (for no more than 3 nights per week)</p>	<ul style="list-style-type: none"> • Installation of signal equipment and cable pulling. • Various site investigations and surveys including but not limited to non-destructive digging, soil assessments, geotechnical investigations and surveys for drainage, utilities, and fencing. • Delivery of plant and material including preparatory activities for upcoming out-of-hours work. • Concrete works associated with installing galvanised steel troughing, new cable routes and bridge upgrades.
<p>Upcoming rail possessions;</p> <p>Saturday 7 May to Monday 9 May 2022</p> <p>Monday 16 May to Thursday 19 May 2022</p>	<ul style="list-style-type: none"> • Footbridge remediation work, including installation of structural steel, roof structure and gutter • Replacement of existing platform stairs and installation of new customer lifts on Platform 1 and 2 <ul style="list-style-type: none"> ○ There will be a full road closure of Broughton Street between Canterbury Road and Robert Street will be in place from 8pm Friday 6 May to 2am Monday 9 May for facilitation of crane activities. Detour through Robert Street (local residents will be notified closer to work taking place) ○ The existing bus stops on Broughton Street will be temporarily relocated during this time. Up to 12 car parking spots on Broughton Street (between Robert and John Street) will be unavailable, to facilitate the temporary bus stop and manouvre of oversized vehicles. Directional signage will also be in place at the affected stops to direct customers. • Installing segregation fencing, fence footing and services (including drainage and electrical services) • Installing signalling equipment, cable service routes and services containment on Platforms 1 and 2 and inside the rail corridor • Single lane closure on Charles St for the safe entry, delivery, and removal of material in and out of the construction compound and rail corridor • Set up of a crane at 6 Broughton St vacant lot to facilitate the underline rail crossing work to be undertaken in the rail corridor • Electrical and cabling work around station precinct and on Canterbury Road, including reroute of the main power supply to station precinct • Modification to bridges along the alignment including temporary lane closures along Melford Street Bridge • Temporary closure of Church Street footbridge from midnight Saturday 7 to 2am Monday 9 May 2022. Pedestrian diversions are in place via Church Street, Tincombe Street, Canterbury Road and the public footpath between the rail corridor and the former Canterbury Bowls Club • Removal of trees and vegetation throughout the rail corridor where required • Removal of parking spaces along Canberra Street adjacent to the rail corridor.

Equipment used for the above work will include heavy machinery (including but not limited to excavators, jack hammers, vacuum trucks, slashers, motorised saws, concrete trucks, elevated work platforms, concrete pumps, cranes, cable pulling equipment, road sweeper, compactors, lighting towers, forklifts, chainsaws, and water carts), and hand and power tools.

Access to buildings and driveways will be maintained at all times. Some of this work may be noisy, however we will take every possible step to minimise noise such as switching off equipment when not in use and using non-tonal reversing beepers.

Keeping you informed

Properties close to the rail corridor will receive notifications when construction work is scheduled to occur. You can contact us on **1800 171 386** (24-hour community information line). If you have questions about the **substations** please ask for **Chris** or email LinewideMetro@transport.nsw.gov.au. For all other works please ask for **Natalia** or email SouthwestMetro@transport.nsw.gov.au. **Thank you for your cooperation while we complete this essential work.**

If you need an interpreter, contact TIS National on **131 450** and ask them to call **1800 171 386**
