

# Public holiday work notification

April 2022

## Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central.

In 2024, Sydney will have 31 metro railway stations and a 66 kilometre standalone metro railway system. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

The new Waterloo integrated station development includes construction of the new Waterloo metro station by John Holland, while a joint venture between John Holland and Mirvac will deliver the Waterloo Metro Quarter, including buildings above and next to the station.

## Work over the Easter long weekend

John Holland has recently reassessed the process to complete utility work around the Botany Road and Henderson Road intersection. The road closure rules in this area mean that only a limited amount of work can be completed each night. Over weekends and public holidays traffic levels are reduced which allows us to request longer closures of the Botany Road and Henderson Road intersection. To take advantage of this, we will carry out utility work in this area from **7am on Friday 14 April** until **6pm on Monday 18 April**. By working continuously over the long weekend, we will be able to significantly reduce the number of shifts required in this area.

Across the long weekend, traffic control will be in place at the Botany Road and Henderson Road intersection and the intersection will be reduced to one lane for most of the time. Parking will also be removed from the eastern side of Botany Road. High noise activities such as hammering and saw cutting may be experienced during this time.

If this work is unable to be completed over the Easter long weekend due to inclement weather, this work will be carried out the following weekend (23 to 25 April).

## What to expect

- Equipment used will include, but is not limited to, hand-held and electric tools, welders, power drills, excavators, concrete trucks, light and heavy vehicles, pavement cutters, vacuum trucks and asphalt compactors.
- Due to the nature of the work, nearby residents may be able to hear noise and feel vibration from some of the work. The project team will limit these impacts wherever possible. A range of mitigation measures are in place to meet the project's approval conditions and reduce noise, including, turning off equipment when not in use and, where possible, equipping machinery with non-tonal movement alarms. Respite from high impact work such as hammering is also provided i.e. three hours of work, followed by one-hour respite.
- Traffic control will be in place at the Botany Road and Henderson Road intersection and parking will be removed from the eastern side of Botany Road. Temporary traffic changes will be in place for the safety of workers and the community during this work, including reduced speed limits, footpath and multiple lane closures.
- Where utility work is required near trees, tree protection measures will be implemented.
- Work updates about out-of-hours work will be distributed via email rather than letterbox drop. To ensure you receive these updates, sign up to our email distribution list.
