

Notification – Five Dock

20 May 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Sydney Metro was granted planning approval to construct twin underground rail tunnels between Westmead and The Bays for Sydney Metro West in March 2021.

Acciona Ferrovial Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations, including a station at Five Dock.

Utility connection work at Five Dock

The tunnelling contractor, AFJV, is undertaking utility work around the Five Dock Station construction sites and will be conducting utility connection work in **East Street Five Dock** (see map overleaf).

Work to install a new water connection to the western construction site will be carried out **from Friday 27 May 2022 for up to four days** (weather and site conditions permitting) during standard construction hours:

- Monday to Friday 7am – 6pm and Saturday 8am – 6pm

High noise intensity work such as saw cutting or jack hammering is restricted to Monday to Friday 8am to 6pm and Saturday 8am to 1pm and is subject to a one (1) hour respite period after each three (3) hour work period.

The work will include:

- Opening the roadway with a concrete saw to excavate a trench across the road.
- Installing a new water connection from the existing main to the western construction site.
- Backfilling the trench and reinstating the roadway.

What to expect:

- There will be noise associated with this work but we will try to minimise it as much as possible
- Noise blankets will be in place where possible to minimise the impact
- Access to the southern end of East Street near the work area will be restricted to residents and the Sunshine Early Learning Centre drop off/collection only during this work (see map overleaf)
- Traffic controllers will assist with access and parking for drop off/collection near the childcare centre

Equipment used:

Equipment used for this work includes but is not limited to: concrete saw, excavator with jack hammer attachment, plate compactor, vacuum truck, light vehicles, hand tools and other safety equipment.

Changes to traffic, pedestrian and cyclist routes:

Traffic control personnel will be in place to safely assist motorists, pedestrians and cyclists with temporary changes to traffic conditions. The southern end of East Street will be restricted to resident access and the Sunshine Early Learning Centre drop-off/collection only. Pedestrian access will be maintained on the western side of East Street around the work area as shown below.
