

Notification – Central Station

25 May 2022

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central.

In 2024, Sydney will have 31 metro railway stations and a 66 km standalone metro railway system – the biggest urban rail project in Australian history. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

Laing O'Rourke is delivering the new Sydney Metro platforms under Central Station as well as the landmark Central Walk - a new underground pedestrian concourse to help customers get around Sydney's busiest railway station.

Work at 20-28 Chalmers Street - temporary partial road closure of Randle Lane, Surry Hills

New service connection and installation work is continuing within our site at 20-28 Chalmers Street. In January, we notified that a temporary partial road closure of Randle Lane would be in place for approximately four months. The services work in this area will require an additional two months to complete. As such, the Randle Lane temporary partial road closure will remain in place until August 2022.

In June, we will continue the installation and connection of a new sewer and the installation of two new communications pits on Randle Lane (see map overleaf for work area). This work will be completed within standard construction hours (from 7am until 6pm Monday to Friday, and from 8am until 1pm on Saturdays).

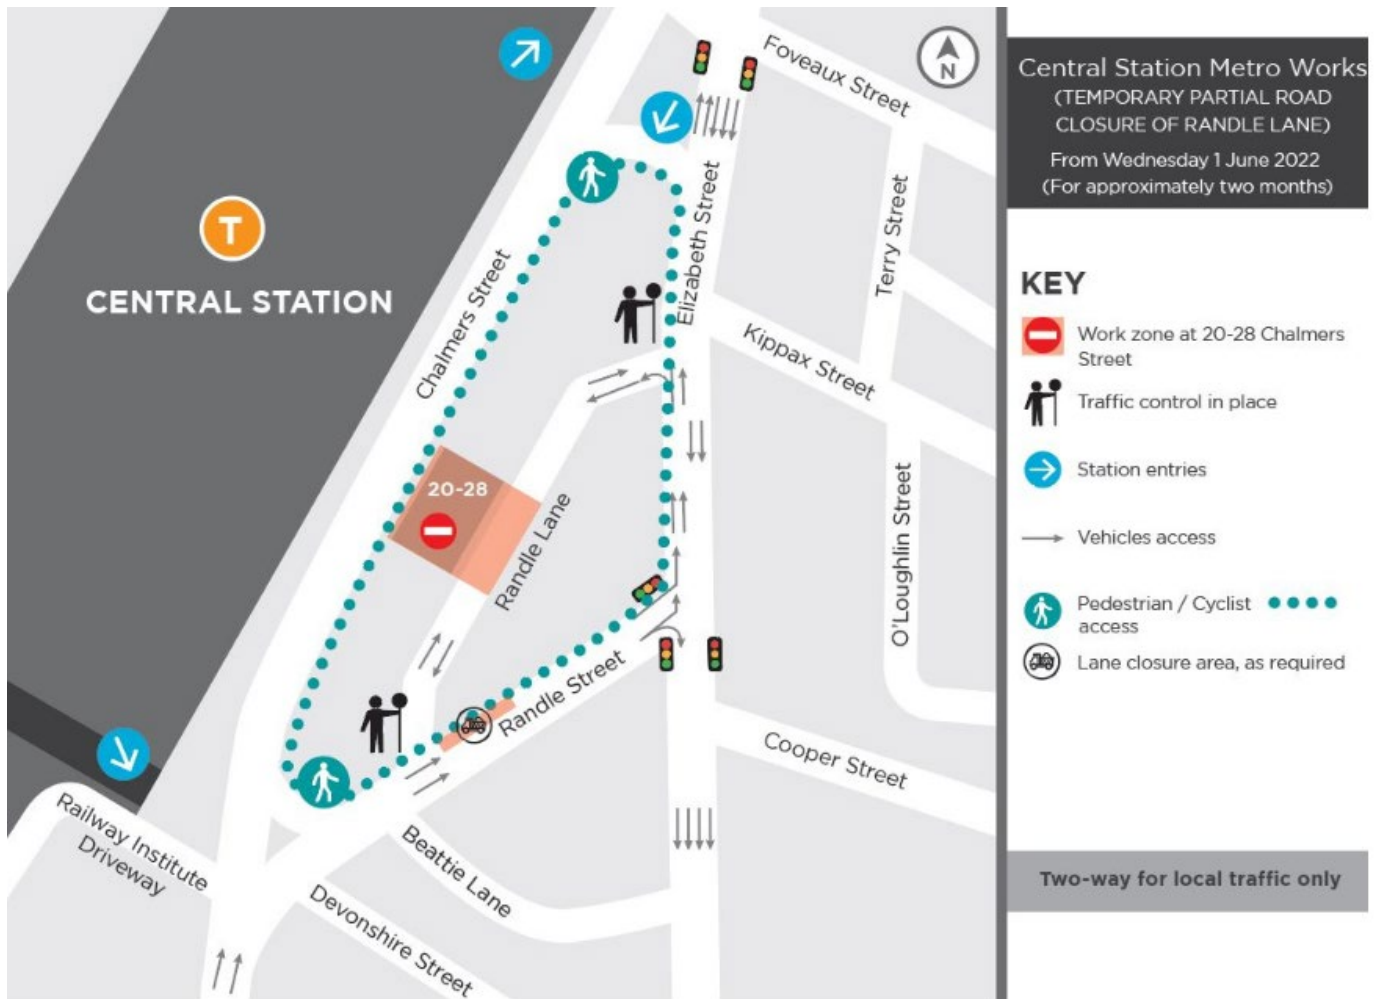

What to expect

- Excavation involving rock hammering will be required. High-impact noise and vibration activities are only permitted from 8am until 6pm Monday to Friday, and from 8am until 1pm on Saturdays. A 1-hour respite period will be provided following 3-hours of highly noise intensive work.
- Equipment and plant to be used during this work will include an excavator, vacuum truck, crane, rock hammer, concrete saw, hand tools and light vehicles.

Access to Randle Lane

- Randle Lane will remain partially closed, and accessible for local traffic only. Access and egress will be available from the north via Elizabeth Street, or from the south via Randle Street
 - Access to private properties and emergency exits on Randle Lane will be maintained at all times; however, we appreciate your patience if there are slight delay in facilitating access (for example, in the instance we need to move a delivery vehicle)
 - Please follow the signage and directions of traffic control in the area
 - Other road users should avoid Randle Lane and follow the directions of traffic control at all times
- Randle Lane will be closed to pedestrians and cyclists
- Traffic control will be located at both entrances to Randle Lane to safely guide local traffic, pedestrians and other road users around our work area.

Work area at 20-28 Chalmers Street

Thank you for your patience while we undertake these necessary works. Please register for email updates at sydneymetro.info for further information, or contact us on **1800 171 386** or via centralstationmetro@transport.nsw.gov.au.

Other Sydney Metro work in Surry Hills

Systems Connect is continuing with the installation of a new underground power cable from the Ausgrid substation at Surry Hills to Central Station. In June 2022, Systems Connect will be working on Randle Lane, near Elizabeth Street and a separate community notification will be distributed by Systems Connect, providing further detail about the work. These activities will be noisy and we thank the community for their patience as we carry out this important work. If you have any questions about the power cable work, please contact 1800 171 386 or email LinewidthMetro@transport.nsw.gov.au.
