

## Notification – Central Station

24 June 2022

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central. By 2030, Sydney will have four metro lines, with 46 stations and a 113 kilometre standalone metro railway system. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre. Laing O'Rourke is delivering the new Sydney Metro platforms under Central Station as well as the landmark Central Walk - a new underground pedestrian concourse to help customers get around Sydney's busiest railway station.

### Work at 20-28 Chalmers Street: stormwater installation work within the bike lane and footpath

Construction of the new Chalmers Street entrance to Central Station is continuing. In July, Sydney Metro will install a new stormwater drain within the bike lane and footpath on Chalmers Street, directly in front of the work site (please see the map overleaf).

Starting **Friday 1 July (6pm)**, this work will take two weeks as we excavate for and install a new stormwater pit and related pipes. A temporary work area will be established, and cyclists will be detoured via Randle and Elizabeth streets during this period. The work within the footpath will be completed from late Friday 8 July to early Monday 11 July, with pedestrians detoured to the western footpath on Chalmers Street for this weekend.

### What to expect

- Site mobilisation will take place **from 6pm Friday 1 July to 7am Saturday 2 July\***
- The work area will be demobilised **from 1am to 7am Sunday 17 July\***
- Day work will be completed from 7am to 6pm Monday to Friday, and from 8am until 1pm on Saturdays
- The work within the footpath will take place **from 6pm Friday 8 July until 7am Monday 11 July**
- Some activities including jackhammering will result in noisy periods. Mitigation measures will be in place to minimise disruption
- Machinery will include a rock saw, jackhammer, vacuum truck, construction vehicles and trucks along with hand and power tools
- Traffic control will be in place to safely manage vehicles, pedestrians, and cyclists
- Construction vehicles will be moving around the work area to complete deliveries and work activities
- \*Site mobilisation and demobilisation is required to occur during this period while the light rail is not running.

All businesses including the Sydney Dental Hospital will remain open during this work. Access to these businesses will be maintained at all times.

### Access changes

- **Pedestrians will be temporarily detoured** to the western footpath on Chalmers Street **from 6pm Friday 8 July until 7am Monday 11 July**. This detour is required to facilitate work within the footpath
- **Cyclists will be temporarily detoured** via Randle and Elizabeth streets **from 6pm Friday 1 July until 7am Sunday 17 July**.

### Randle Lane

The **temporary partial road closure will be reinstated** from **Thursday 30 June until Sunday 31 July** to facilitate final service installation and connection work in Randle Lane. Traffic control will be in place to safely manage the area during this period.

## What is next

In August, we will return to complete a water main connection within the footpath on Chalmers Street. The footpath will be closed, and pedestrians will be detoured via the western footpath on Chalmers Street. The hoarding in front of our site at 20-28 Chalmers Street will be adjusted around this time, and more information will be provided in the coming notification. This adjustment will facilitate the construction of the façade and final service connection work for the new entrance on Chalmers Street.

## Work area on Chalmers Street

**Thank you for your patience while we undertake these necessary works.**
