

Notification – Clyde and surrounds

14 June 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West - a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres. Stations have been confirmed at Westmead, Parramatta, Sydney Olympic Park, North Strathfield, Burwood North, Five Dock, The Bays, Pyrmont and Hunter Street in the Sydney CBD.

Gamuda Australia and Laing O'Rourke Consortium (GLC) has been awarded the contract to deliver the Western Tunnelling Package which involves nine kilometres of twin metro rail tunnels between Westmead and Sydney Olympic Park, excavation for two new metro stations, a stabling and maintenance facility at Clyde and a precast facility at Eastern Creek.

Construction work at Clyde

Tunnelling contractor, GLC will continue works at Clyde and surrounds to prepare for site establishment (see map overleaf for work locations).

Out-of-hours works – Deliveries of oversized equipment

Out-of-hours deliveries will enter and exit site via Unwin Street at the Rosehill Services Facility and unload during standard construction hours to minimise interruption to traffic and to ensure the safety of motorists, pedestrians and workers. This is in line with Road Occupancy Licence and Transport for NSW requirements for the movement of oversized vehicles.

Out-of-hours deliveries of oversized equipment will occur for:

- **one night** during the period of **Tuesday 21 June and Friday 24 June 2022 between 10pm and 5am**
- **five nights** during the period of **Monday 4 July and Sunday 17 July 2022 between 10pm and 5am.**

Utility service providers will continue routine maintenance works on assets at the Clyde stabling and maintenance facility. These works may be conducted out-of-hours as required. Utility service providers will notify impacted stakeholders separately.

Standard construction hours works

Our standard construction hours are from **7am and 6pm Monday to Friday and 8am to 6pm on Saturdays.**

During standard hours works will include:

- Ongoing structural demolition and clearing
- Surveying local roads and nearby streets to record their existing condition
- Conducting geotechnical investigations to assess ground conditions and to monitor groundwater
- Conducting utility investigations including potholing and removing redundant services and diverting sewer services at the corner of Shirley and Unwin Streets
- Excavating to prepare for guide walls
- Activities for site establishment including:
 - Installing fencing, hoarding and signage to prepare work areas
 - Installing site amenities including lunch sheds, office sheds and portable toilet facilities
 - Constructing site access at an existing site entry point on the north-west corner of Unwin Street
 - Installing environmental controls including sediment control fencing.

Permanent road closures: Deniehy Street, Tennyson Street and the northern part of Wentworth Street will be permanently closed from **7am Tuesday 14 June** as they will form part of the Clyde Stabling and Maintenance Facility site, see map for details.

What to expect:

- Out-of-hours deliveries to site for six nights to minimise impacts to local community
- Some activities will generate noise, but this will be minimised as much as possible
- Access to property and businesses will be maintained at all times
- Increased traffic during the delivery of machinery and equipment
- Signage and traffic control will be in place to assist motorists, pedestrians and cyclists with changes to traffic conditions. This may include contraflow traffic flow, stop-slow traffic controls, or partial road closures
- Temporary loss of parking on sections of Wentworth, Kay, Unwin and Shirley Streets to allow roadside utility investigations.

Equipment used:

Equipment used for this work will include but is not limited to cranes, trucks and pilot vehicles, hand tools, survey equipment, light vehicles, drill rigs, excavators, backhoes, vacuum excavation trucks, tipper trucks, vibratory roller, chainsaws, mulchers and temporary fencing.

Location of work

Contact us

We will continue to keep you updated about works in the Clyde area. Your Place Manager for Sydney Metro West at Clyde is Olivia. Olivia is your main contact for questions about the project and can be contacted on 1800 612 173 or at metrotunnelsGLC@transport.nsw.gov.au.

Sydney Metro has launched Sydney Metro Connect – a new way to stay informed. You can download Sydney Metro Connect on the App Store or get it on Google Play.

Thank you for your cooperation while we complete these essential works.
