

Notification – Construction update

27 June 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Stations have been confirmed at Westmead, Parramatta, Sydney Olympic Park, North Strathfield, Burwood North, Five Dock, The Bays, Pyrmont and Hunter Street in the Sydney CBD.

Sydney Metro was granted planning approval to construct twin underground rail tunnels between Westmead and The Bays for Sydney Metro West in March 2021.

Geotechnical investigations: Pyrmont

We are continuing to complete essential geotechnical investigations in the Pyrmont area. This work is required to determine the underlying rock condition that will inform the early design for Sydney Metro West.

Previously advised investigation work will now be carried out on:

- Saunders Street from **Monday 4 July 2022 until Friday 15 July 2022**
- Harris Street from **Monday 11 July 2022 until Friday 29 July 2022**
- Union Street from **Tuesday 26 July 2022 until Friday 19 August 2022**

This work will be carried out during standard construction hours:

- Monday to Friday 7am to 6pm and Saturday 8am to 1pm

This program is indicative only with weather and site conditions permitting.

Equipment used:

Equipment used for this work includes but is not limited to: drill rig, specialised ground-penetrating equipment, vacuum trucks, hand tools including jackhammers and road saws, temporary fencing, light vehicles, and generators.

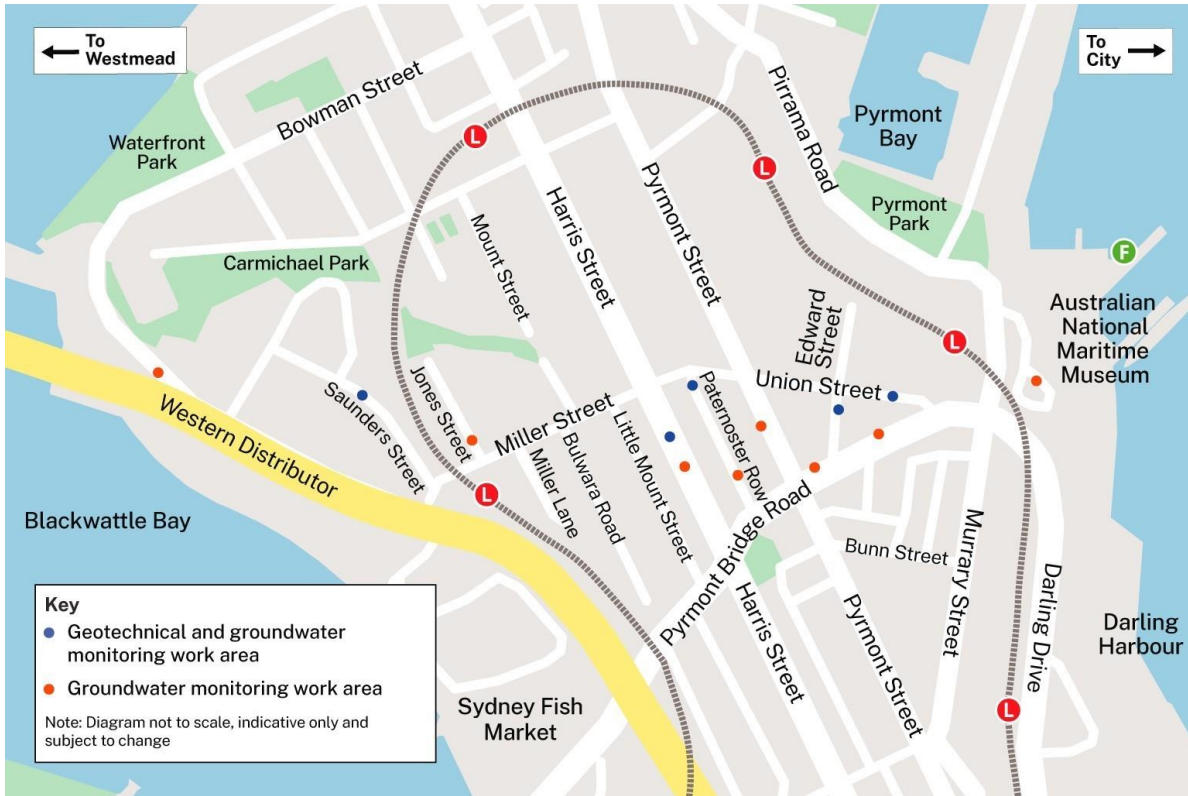

Groundwater monitoring

During our geotechnical work we installed groundwater monitoring wells. From street level they appear as a small metal cover in the road or nature strip. We are continuing to visit these wells to take samples, which help us understand the depth and content of the groundwater in this area. We use this information to assist in our planning and construction of Sydney Metro.

Work will involve:

- Establishing a temporary site with site fencing and setting up traffic management to maintain traffic flow
- Using a truck or track-mounted drill rig to bore below ground level
- Reinstating the area at completion of the work
- Taking samples of groundwater.

Work areas

What to expect:

- Some noise is expected in stages as we cut through the road or pathways.
- Marking up service locations and temporary lights will be set up and directed at the site for safety purposes
- Access to pathways and buildings will be maintained at all times
- Parking may be temporarily restricted in some locations
- Traffic control and directional signage may be used for the safety of works and the community
- Pumping of groundwater from boreholes during sampling.

Contact us:

Sydney Metro recognises that our work will have impacts and wherever possible we will work with the community to mitigate these impacts. We will continue to keep you updated on the progress of works in your area. Sydney Metro has launched Sydney Metro Connect – a new way to stay informed. You can download Sydney Metro Connect on the App Store or get it on Google Play.

Your local Place Manager, Kelly will be your main contact for questions and enquiries regarding the project and can be contacted on 1800 612 173.

If you would like to receive these updates via email, please contact Kelly who can add you to the distribution list. Our email is: sydneymetrowest@transport.nsw.gov.au

Thank you for your cooperation while we complete these essential works.
