

# Notification – Central Station

12 July 2022

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown, with new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central. By 2030, Sydney will have a network of four metro lines, 46 stations, and 113km of new metro rail.

## Services works on Chalmers Street

On Friday, 24 June you received a community notification in your letterbox about services work taking place in the bike lane and footpath directly in front of the Sydney Metro worksite on 20-28 Chalmers Street.

### Works in the footpath

Over the weekend, the team encountered unexpected ground conditions, and a water leak was discovered which requires Sydney Water inspection.

As a result, the work including remediation and reinstatement of the footpath will potentially continue **until Saturday, 16 July** (weather permitting and pending approvals). The hours of work will be **7am to 6pm**, with high impact noise and vibration works only permitted between 8am and 6pm. All reasonable and feasible noise and dust mitigation measures will be in place.

**This means the footpath will remain closed until it can be safely reinstated and reopened to the public.**

### Works in the bike lane

In parallel, services work in the bike lane will continue until Sunday 17 July.

Equipment used for the work will include jackhammers, excavators, vacuum trucks, rollers, construction vehicles, and hand and power tools. Similarly, all reasonable and feasible noise and dust mitigation measures are in place.

The existing detours for pedestrians and cyclists will remain in place until these works are completed – please see map below.

All access to residential buildings and shops in the area will be maintained.

***Thank you for your cooperation while we complete this essential work.***

## Work area – Surry Hills
