

Project update – Marrickville Dive Site & Sydney Metro Trains Facility South

August 2022

Sydney Metro is Australia’s biggest public transport project.

Services started in May 2019 in the city’s north west with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown, with new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central. By 2030, Sydney will have a network of four metro lines, 46 stations, and a 113 kilometre of new metro rail.

Systems Connect (an unincorporated joint venture between CPB Contractors and UGL Limited) is delivering line-wide work including installing metro rail track, power systems and infrastructure to turn the excavated tunnels into a working railway between Chatswood and Sydenham. Line-wide work also includes the permanent systems, services and buildings required for Sydney Metro operations between Chatswood and Bankstown.

At Marrickville, Systems Connect is responsible for the design and construction of Sydney Metro Trains Facility (SMTF) South, the dive buildings and services buildings.

Day work- Project standard working hours are Monday to Saturday, 7am - 6pm and Saturdays, 8am-6pm

Location	Details
Marrickville Dive Site and SMTF South	<ul style="list-style-type: none"> • Delivery of heavy machinery and large equipment and materials for work in the tunnels, the dive site and SMTF South, including concrete sleepers and floating track slabs. • Installation of: <ul style="list-style-type: none"> ○ Acoustic panels in the tunnels ○ Cables and cabinets in services building ○ Structural steel and inground services for the services buildings ○ Street lighting foundations in the SMTF South ○ Ground water treatment tanks ○ Trackside equipment and cable pulling in the yard ○ Electrical, mechanical, hydraulics and fire services ○ Buffer stops ○ Overhead wiring and jewellery • Track construction in the tunnels and in the yard • Mechanical and electrical fit out of the tunnels, cross passages, the yard and buildings • Form reinforcement pour (FRP) work for the road pavements and footpaths • Earthworks to achieve final levels across SMTF South • Concrete delivery, pouring and pumping • Survey work and workers accessing the tunnels • Roof sheeting and cladding work for services buildings • Placement of ballast for the stabling yard • Ventillation equipment delivery and installation at the Southern Dive Building • Cable pulling across the Southern Dive Building, service buildings and yard • Installation of security fencing at the stabling yard

Out-of-hours work (night) – Due to the nature of some activities and for the safety of workers, some work will occur outside standard construction hours

Date/time	Location	Detail
24/7 during August	Marrickville Dive Site and SMTF South services buildings	<ul style="list-style-type: none"> • Delivery of plant, machinery, concrete and materials for tunnel fit-out work • Installation of cables and trackside equipment in the tunnels • Fit-out of tunnels and cross passages • Construction of rail track and rail installation inside the tunnels and portals • Earthwork, formwork, reinforcement and concrete pouring • Transformers delivery
Sundays from 7am to 6pm	SMTF South services buildings	<ul style="list-style-type: none"> • Low impact noise activities including earthworks, crane lifts, formwork, reinforcement, material movement, pumping and concreting

What to expect

- Equipment used will include handheld and electric tools, power drills, vibratory equipment, rollers, excavators, skid-steer loaders, concrete mixers and pumps, hi-rail equipment (i.e. excavator, trolleys, tugs), bobcats, forklifts, rollers, mobile cranes, Elevated Work Platform (EWP), lighting towers, light trucks and heavy vehicles and tippers.
- Some of this work will be noisy. The project team will take every step possible to minimise noise. A range of mitigation measures are in place to meet the project’s approval conditions and reduce noise, including noise barriers, using only the necessary equipment for each task, turning off equipment when not in use. All machinery will have non-tonal movement alarms.
- Some equipment will be delivered outside standard construction hours in line with Transport for NSW requirements for transporting oversized vehicles.
- General construction deliveries and tunnel fit out will continue 24 hours a day, as per the project’s planning approvals. All relevant mitigation measures will be in place to reduce noise impacts where possible.

Keeping you informed

To keep up to date on work taking place at the Marrickville Dive Site and SMTF South, please register for email updates. You can register for updates by contacting LinewideMetro@transport.nsw.gov.au, or call us on **1800 171 386**. Thank you for your cooperation while we complete this essential work.
