

Project update – Dulwich Hill substation install

July 2022

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown, with new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central. By 2030, Sydney will have a network of four metro lines, 46 stations, and 113km of new metro rail.

Systems Connect (an unincorporated joint venture between CPB Contractors and UGL Limited) is delivering line-wide work including installing metro rail track, power systems and infrastructure to turn the excavated tunnels into a working railway between Chatswood and Sydenham. Line-wide work also includes the permanent systems, services and buildings required for Sydney Metro operations between Chatswood and Bankstown.

Substation module installations

Systems Connect will lift and position the substation modular buildings into their final positions at the site behind Randall Street, Marrickville from **10pm Wednesday 13 July to 10pm Thursday 14 July 2022 around the clock**. This work may take longer to complete. We will also be doing some work to prepare the site during the day on Wednesday 13 July 2022.

Now that the Sydney Trains industrial action has been resolved for the moment, we are able to install a 400T crane to site and lift the modular substation buildings into place.

While we do this, due to the tight constraints of our site, we need to reconfigure some of our site and move the modular buildings into and out of site safely. This means we will need to make **Randall Street Marrickville a temporary no parking area from 10pm Wednesday 13 July to 10pm Thursday 14 July 2022 around the clock**.

Work will involve using heavy vehicles to move the modular buildings into place, setting up temporary barriers and landings to store the modular buildings, traffic management, lighting and daymakers, minor tree trimming, installing and setting up a 400T crane into site, using support cranes, using heavy vehicles to manoeuvre the modular buildings onto the road and onto the site, and lifting the modular buildings into place. We will set up safe work areas on the road where required.

We will use the following machinery: a pick and carry crane with semi trailers, an elevated work platform, two trucks with oversized loads and two trucks with low loads, cranes and support cranes, lighting towers and construction vehicles.

We will NOT disconnect power during this time.

Temporary no parking

To do this work safely, we need to make **all of Randall Street Marrickville temporary no parking from 10pm Wednesday 13 July until 10pm Thursday 14 July 2022**. This is so we can safely manoeuvre the buildings into and out of site. Please either park in your driveway or at a neighbouring street during this time.

What to expect

Large machinery will be used throughout this time, including cranes, an elevated work platform, oversized trucks and heavy vehicles, support trucks, lighting towers, and construction vehicles.

Some work may be noisy, every step will be taken to minimise noise such as switching off equipment when not in use, using noise barriers wherever possible, and non-tonal reversing beepers. Where lights are required, they will be directed away from residences.

Lifting the precast walls into place

We advised previously the precast walls would be lifted into site during mid-July. This has now changed to early August 2022. We will provide you with further information closer to the date.

Map of the work area

Respite

You may be eligible for respite for this work. Please email engagement@sclww.com.au to find out more.

Keeping you informed

To keep up to date about the substations and power cable work, please register for email updates. Send your details to linewidemetrometro@transport.nsw.gov.au, or call us on **1800 171 386**. Thank you for your cooperation while we complete this essential work.
