

Notification – Parramatta

1 July 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West - a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres. Stations have been confirmed at Westmead, Parramatta, Sydney Olympic Park, North Strathfield, Burwood North, Five Dock, The Bays, Pyrmont, and Hunter Street in the Sydney CBD.

Gamuda Australia and Laing O'Rourke Consortium (GLC) has been awarded the contract to deliver the Western Tunnelling Package which involves nine kilometres of twin metro rail tunnels between Westmead and Sydney Olympic Park, excavation for two new metro stations, a stabling and maintenance facility at Clyde and a precast facility at Eastern Creek.

Construction work in July

Construction work in and around the future Parramatta metro station site will be ongoing throughout July.

Work to remove Sydney Metro owned buildings on Macquarie, George and Church streets is expected to be complete by mid-July. Our demolition contractor, Delta will hand the western side of the site over to GLC in mid-late July. Site investigations will start soon after to prepare for the start of station construction later in the year. Delta will continue to occupy the eastern side of the site until late 2022 to complete ongoing archaeological investigations.

Please see the map overleaf for the site layout and work locations.

Our standard construction hours are **Mondays to Fridays 7am to 6pm** and **Saturdays 8am to 6pm**. In late July, we may need to transport some oversized equipment off site outside of standard work hours to minimise impacts to road users and the community.

Work will include:

- Completing demolition work and removing building materials from site
- Removing scaffolding and installing fencing and signage
- Ongoing archaeological investigations in the southern-eastern corner of the site
- Establishing GLC work areas on the western side of the site, including utility investigations and surveying
- Delivering and removing machinery and equipment to and from site.

What to expect:

- Some activities will generate noise, but this will be minimised as much as possible
- Access to businesses will be maintained, unless arrangements are made with you in advance
- Parking may be temporarily restricted in some locations
- Traffic controllers and signage will be used to direct pedestrians and traffic around work areas
- Environmental measures are in place to mitigate construction impacts, including noise and vibration monitoring and dust suppression.

Location of work:
