

Monthly update – The Bays, Rozelle

August 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Sydney Metro was granted planning approval to construct twin underground rail tunnels between Westmead and The Bays for Sydney Metro West in March 2021. Acciona Ferrovial Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations, including a station at The Bays.

Site establishment work: The Bays Station site

Site establishment work within The Bays Station site will continue throughout August. The main activities will include station box excavation, acoustic shed construction and establishing tunnelling facilities.

Work during August includes:

- Utility relocation and geotechnical investigation work (including night work along the Port Access Road and Robert Street which has been notified separately)
- Piling work for the acoustic shed (this activity will continue to be carried out until 10pm on weeknights)
- Station box excavation
- Installation of ground anchors for the station box walls
- Ground improvement work at White Bay Power Station
- Establishment of tunnelling facilities
- Construction of acoustic sheds and gantry beam

Work hours

Unless otherwise stated above, this work will be carried out during standard construction hours:

- **Monday to Friday 7am – 6pm and Saturday 8am – 6pm**

Some work must be undertaken outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians and workers. Separate notifications will continue to be provided for out-of-hours work.

What to expect:

- There may be some noise associated with the work but we will try to minimise this as much as possible
- Strict safety and environmental controls will be in place for all work
- Vehicles will be parked within the construction site

Equipment used:

Equipment used for this work includes but is not limited to: trucks, light vehicles, excavators, graders, watercarts, telehandlers, vacuum trucks, rollers, concrete trucks, concrete pumps, hand tools, cranes, piling and drill rigs.

Changes to traffic, pedestrian and cyclist routes:

Traffic control will be in place to assist motorists, pedestrians and cyclists with temporary changes to traffic conditions during the night work including stop-slow traffic controls and partial road and footpath closures. Internal traffic management measures will be in place for work within The Bays construction site.

The Bays work area

Contact us:

Please contact Kim from the AFJV community team on **1800 612 173** if you have any questions, complaints or would like to provide feedback about the work, including appropriate respite periods. We will continue to keep you updated on the progress of work in your area. If you would prefer to receive updates by email, please send a request to **metrotunnelsAFJV@transport.nsw.gov.au** and we will add you to the distribution list.

Sydney Metro has launched Sydney Metro Connect – a new way to stay informed. You can download Sydney Metro Connect on the App Store or get it on Google Play.

Thank you for your cooperation while we complete this essential work.
