

Project update – Dulwich Hill substation street work

August 2022

Delivering the substation transformers to site

Systems Connect will install the new transformers into the Dulwich Hill substation site at Randall Street, Marrickville, on the weekend of 12-14 August 2022. We will deliver these to site **during the after hours period between 12am to 5am on Saturday, 13 August 2022.**

The transformers will be delivered on heavy vehicles to site and at night along Canterbury Road citybound, then onto Old Canterbury Road, then Railway Terrace Lewisham, then Livingstone Road until Marrickville Road where we will turn right, then left onto Wardell Road Dulwich Hill, then left onto Ewart Street, left onto Beauchamp Street, left onto Livingstone Road Marrickville, and finally, reverse into Randall Street.

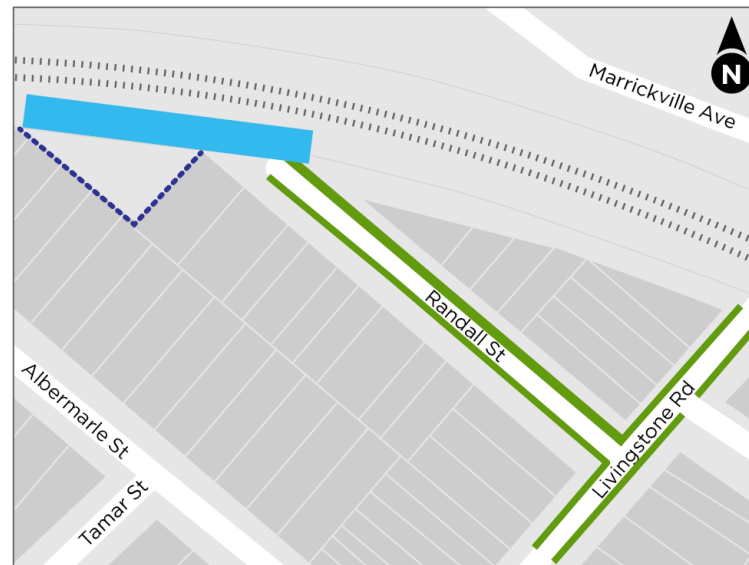

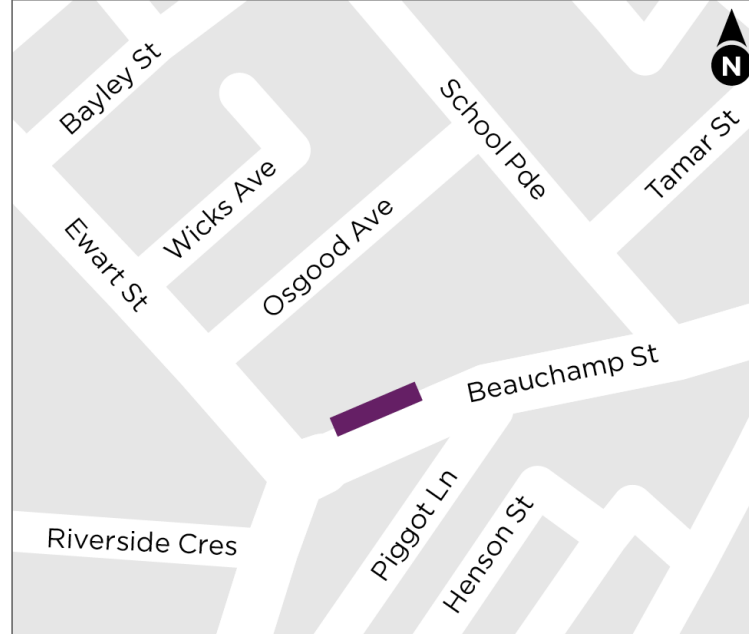

We are taking this route in order to avoid low hanging powerlines that would mean we would need to temporarily switch off electricity.

A map and description of our work is included over the page. Please note the temporary parking restrictions over the page. These traffic changes begin from 3pm on Friday, 12 August and return the road to its usual state once delivery is completed.

You can expect heavy vehicles, lighting towers, support trucks, and the use of hand and power tools. Some of the work may be noisy and every step will be taken to minimise noise, including switching off equipment when not in use and using non-tonal reversing beepers. Where lights are required, they will be directed away from residences.

We would like to talk to you

To keep up to date, please register for email updates. Send your details to LinewideMetro@transport.nsw.gov.au or call us on **1800 171 386**. Thank you for your cooperation while we complete this essential work.
