

Project update – Dulwich Hill precast wall panel and transformer installation

August 2022

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown, with new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central. By 2030, Sydney will have a network of four metro lines, 46 stations, and 113km of new metro rail.

Systems Connect (an unincorporated joint venture between CPB Contractors and UGL Limited) is delivering line-wide work including installing metro rail track, power systems and infrastructure to turn the excavated tunnels into a working railway between Chatswood and Sydenham. Line-wide work also includes the permanent systems, services and buildings required for Sydney Metro operations between Chatswood and Bankstown.

Precast wall and transformer installations

Systems Connect will lift and position precast concrete walls and two transformers into the substation site behind Randall Street, Marrickville from **3pm Friday 12 August until 10pm Sunday 15 August 2022 around the clock**. We will need to install a 250T crane onto site and lift the precast walls and transformers into place.

This work is subject to Sydney Trains industrial action and we will advise of any changes to the work schedule closer to the date.

Due to the constraints within our site, we need to reconfigure some of our work area and move the transformers and precast walls into and out of the site safely. This means that we will need to make **all of Randall Street Marrickville and the intersection at Livingstone Road with Randall Street a temporary no parking area from 3pm Friday 12 August until 10pm Sunday 15 August 2022 around the clock**.

Work will involve using heavy vehicles to move the precast walls and transformers into place, setting up temporary barriers and landings to store the transformers if needed, traffic management, lighting and daymakers, minor tree trimming, installing and setting up a 250T crane into site, using support cranes, using heavy vehicles to manoeuvre the transformers onto the road and onto the site, and lifting the transformers into place. We will set up safe work areas on the road where required.

We will use the following machinery: a pick and carry crane with semi-trailers, an elevated work platform, two trucks with oversized loads and two trucks with low loads, cranes and support cranes, lighting towers and construction vehicles.

We will NOT disconnect power during this work.

Temporary no parking

To do this work safely, we need to make **Randall Street Marrickville and the intersection at Livingstone Road with Randall Street a temporary no parking area from 3pm Friday 12 August until 10pm Sunday 15 August 2022 around the clock**.

This is so we can safely manoeuvre the transformers and precast walls into and out of site. Please either park in your driveway or at a neighbouring street during this time. Randall Street residents will be able to move in and out of their properties under traffic management. See the map over the page.

What to expect

Large machinery will be used throughout this time, including cranes, an elevated work platform, oversized trucks and heavy vehicles, support trucks, lighting towers and construction vehicles.

Some work may be noisy, every step will be taken to minimise noise such as switching off equipment when not in use, using noise barriers wherever possible, and non-tonal reversing beepers. Where lights are required, they will be directed away from residences.

Map of the work area

Respite

You may be eligible for respite for this work. Please email engagement@sclww.com.au to find out more.

Keeping you informed

To keep up to date about the substations and power cable work, please register for email updates. Send your details to linewidemetrometro@transport.nsw.gov.au, or call us on **1800 171 386**. Thank you for your cooperation while we complete this essential work.
