

Notification – Construction update

4 August 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West - a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Sydney Metro was granted planning approval to construct twin underground rail tunnels between Westmead and The Bays for Sydney Metro West in March 2021. This includes the construction of a new power supply route from Rozelle substation to the future metro station at The Bays. New cables will be laid underground to provide a dedicated power supply source to the Tunnel Boring Machines (TBMs) for Sydney Metro West.

The contract for the Iron Cove/Rozelle power supply route has been awarded to Quickway.

Construction update – Mansfield Street

We have now installed 100% of the conduits for the project. Thank you for your cooperation while we completed this work.

Three of the four cables between the Ausgrid substation on Manning Street and the Robert Street joint bay have been installed.

Due to unexpected geotechnical conditions near The Bays Station site additional cable was required to complete the project. Due to supply chain challenges, we expect to receive the cable in early to mid-August. As soon as the cable is received, work will be undertaken to complete the installation. The installation work will require a further shift of out-of-hours work at the Mansfield Street joint bay and on the Robert Street joint bay, pending favourable weather and site conditions.

Following this we will joint the cables and temporarily restore the road at both locations which is expected to take about one week to complete. This is the last activity required before the road is permanently restored.

During this break, we have reduced our footprint and impact to parking on Mansfield Street as much as possible. We will keep you up to date as our work progresses

We will keep you up to date as our work progresses.

Changes to pedestrian and cycle routes

Until the cable is installed the temporary traffic changes will remain in place. This will include Mansfield Street staying one way westbound.
