

Notification – St Marys

27 September 2022

Sydney Metro is Australia's biggest public transport project.

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the 23-kilometre new railway will connect the Western Sydney Aerotropolis in the south with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

Construction activities

Power Supply Work will continue at St Marys for the construction of the Sydney Metro – Western Sydney Airport project. A padmount substation will be installed at the Harris Street carpark. This will be required for the construction of a new footbridge. This construction work is expected to commence late 2022. Trenching and under boring work will be carried out to connect to existing power supply.

Work is expected to start from **Tuesday 4 October 2022** and will **continue for up to 4 weeks**, weather and site conditions permitting.

Work will be completed during standard construction hours **Monday to Friday 7am to 6pm** and **Saturday 8am to 1pm**. However, one night of out-of-hours work will be carried out to mitigate risks to worker safety and minimise impacts to nearby businesses when Endeavour Energy carry out power connection activities. This out-of-hours work will be notified for in advance.

Work will include:

- Locating above and below ground services around work sites
- Setting up a temporary workers facilities and laydown area within existing Harris Street car park fencing
- Trenching and under boring along the southern side of Harris Street to install cables and conduits and connect substation to existing power pole
- One night of out-of-hours work in late October for power connection, including removal of existing and installation of new underground and overhead conduits and backfilling around power pole
- Reinstating the work areas following completion of work.

What to expect:

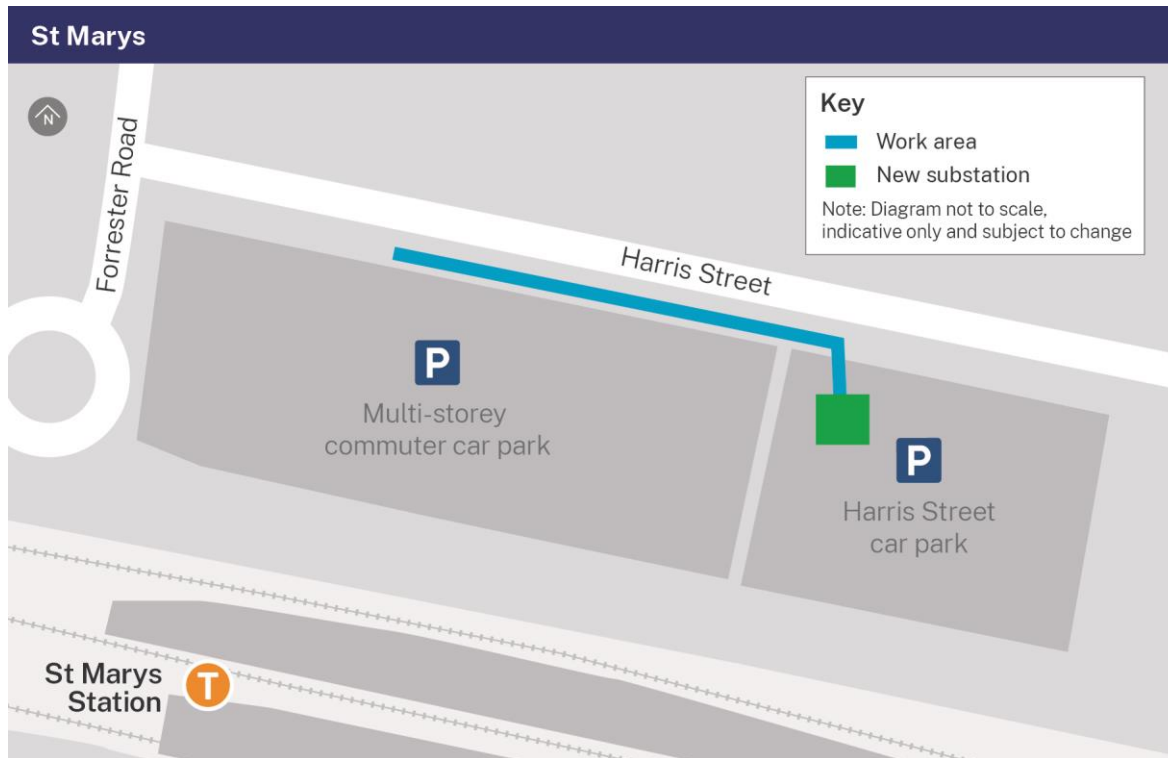

- Traffic controllers and signage will be used to direct pedestrians and traffic safely around work areas
- Mitigation measures will be in place to minimise noise, dust and vibration impacts including monitoring, respite periods and dust suppression
- Access to driveways and buildings will be maintained at all times
- Up to four parking spaces on Harris Street and within the at-grade car park will be temporarily removed to reduce risk to safety of workers and motorists
- Temporary electricity outage outside of business hours during connection in late October.

Equipment used:

Equipment for this work includes but is not limited to excavators, cranes, trucks including delivery, vacuum and water trucks, under boring equipment, cable trailers, elevated work platform and light vehicles.

Changes to traffic, pedestrian and cyclist routes:

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists with any changes to traffic conditions. This may include contraflow traffic flow and stop-slow traffic controls. The times of these changes will vary and are dependent on road authority approvals. Vehicle and pedestrian access to the multi-storey commuter car park will not be impacted during this work.

Minimising community impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

Contact us:

Your local Place Manager for Sydney Metro – Western Sydney Airport is Jonathan. Jonathan will be your main contact for questions and enquiries regarding the project and can be contacted on **1800 717 703**.

If you'd like to receive these updates by email, please contact Jonathan who can add you to the distribution list. Our email is sydneymetrowsa@transport.nsw.gov.au. Thank you for your cooperation while we complete these essential works.
