

Notification – Construction update

27 October 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West - a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Sydney Metro was granted planning approval to construct twin underground rail tunnels between Westmead and The Bays for Sydney Metro West in March 2021. This includes the construction of a new power supply route from Rozelle substation to the future metro station at The Bays. New cables have been laid underground to provide a dedicated power supply source to the Tunnel Boring Machines (TBMs) for Sydney Metro West.

Road restoration work – Mullens Street

Road restoration work is planned to continue near Mullens Street and Mansfield Street intersection on Thursday 3, Thursday 10, Wednesday 16 (contingency only) and Thursday 17 November (contingency only). Out-of-hours work will take place between 7pm and 5am for the scheduled nights. In the event of unforeseen circumstances or poor weather conditions, work will take place on the next available night/s.

This work is part of the first stage to permanently restore this section of road. The second stage will involve placing permanent asphalt on the road and is planned to occur from a later date.

Parking will be temporarily removed prior to the commencement of work and re-instated as work progresses along the street. Alternate parking is available **on surrounding streets in the area.**

Work will involve

- Site establishment and demobilisation
- Establishing temporary traffic controls, road line marking and construction areas
- Concrete and asphalt removal
- Concrete pouring and temporary asphalt placing
- Backfilling and temporarily reinstating the excavated area

What to expect

- Construction machinery and equipment operating onsite
- Increased heavy and light vehicle movements in the area
- This work will generate noise and vibration, the team will minimise impacts where possible
- Traffic management and directional signage to ensure the safety of works and the community
- Temporary removal of parking during the construction period
- Driveway access may be temporarily interrupted during construction. Impacted properties will be notified prior to discuss details
- Pedestrian access to buildings and footpath will be maintained at all times.

Equipment used

Equipment used will include but not be limited to excavators, concrete agitator, road saw, tippers, sucker trucks & vacuum trucks (if required), traffic control vehicles, lighting towers, hand powered tools and equipment, milling machines, rollers and hammer drills.

Changes to traffic pedestrian and cycle routes – Traffic changes

During the work, changes to traffic conditions for pedestrians, cyclists, parking, and motorists will be required and include stop-slow traffic controls. While we are working on Mullens Street, traffic will be reduced to shuttle flow with one lane remaining open for the duration of work. Traffic controllers will be in place to assist motorists, pedestrians, and cyclists.
