

Monthly update – Parramatta

24 November 2022

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West - a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Sydney Metro has been granted planning approval to construct twin underground rail tunnels between Westmead and Hunter Street in the Sydney CBD for Sydney Metro West.

Gamuda Australia and Laing O'Rourke Consortium (GLC) has been awarded the contract to deliver nine kilometres of twin metro rail tunnels between Westmead and Sydney Olympic Park, excavation for two new metro stations, a stabling and maintenance facility at Clyde and a precast facility at Eastern Creek.

Site preparation and establishment work

Tunnelling contractor, GLC will continue site preparation and establishment work within and around the Parramatta metro station site during December to prepare for the start of major construction. These activities will be carried out during standard construction hours:

- **Monday to Friday 7am to 6pm and Saturday 8am to 6pm.**

Work will involve:

- Ongoing archaeological investigations and backfilling of areas once complete
- Continuing geotechnical and groundwater monitoring within and around the site
- Continuing utility investigations and upgrades within and around the site
- Removing concrete sections in stages with saw cutters and jack hammers to clear the site
- Ongoing site establishment including installing fencing, hoarding, barriers and signage, and constructing internal and shared access roads
- Removing waste materials including demolition waste, building and hazardous materials
- Constructing concrete foundations and a piling mat in preparation of excavation activities
- Delivering and removing machinery, equipment and materials to and from site.

All hazardous material removal work is being undertaken in accordance with SafeWork NSW guidelines.

Out-of-hours work

To minimise interruption to local traffic and to ensure the safety of motorists, pedestrians and workers around the site, some work must be undertaken outside standard construction hours.

Out-of-hours work will involve:

- Oversized machinery and equipment deliveries to site between **6pm and 7am from Thursday 1 December to Friday 23 December 2022**. We will keep you informed of out-of-hours deliveries as they are planned.
- Geotechnical investigations on Barrack Lane between **10pm and 5am over six nights from Monday 28 November to Tuesday 13 December 2022**, weather and site conditions permitting.
- Stormwater investigations and utility upgrades on George Street and Church Street between **6pm and 7am, Monday to Friday until Friday 23 December 2022**, weather and site conditions permitting. This will involve:
 - saw-cutting, trenching and potholing
 - removing spoil and stockpiling in the Parramatta site
 - backfilling trenches and temporary restoration of impacted areas.

Out-of-hours deliveries are in line with Road Occupancy Licence; and Transport for NSW requirements to work in the road corridor and for the movement of oversized vehicles. We will keep you informed as out-of-hours work activities progress.

What to expect:

- Some activities will generate noise, but this will be minimised as much as possible
- Access to businesses will be maintained, unless arrangements are made with you in advance
- Environmental measures are in place to mitigate construction impacts, including noise and vibration monitoring and dust suppression
- We do not need to interrupt your power supply to do this work.

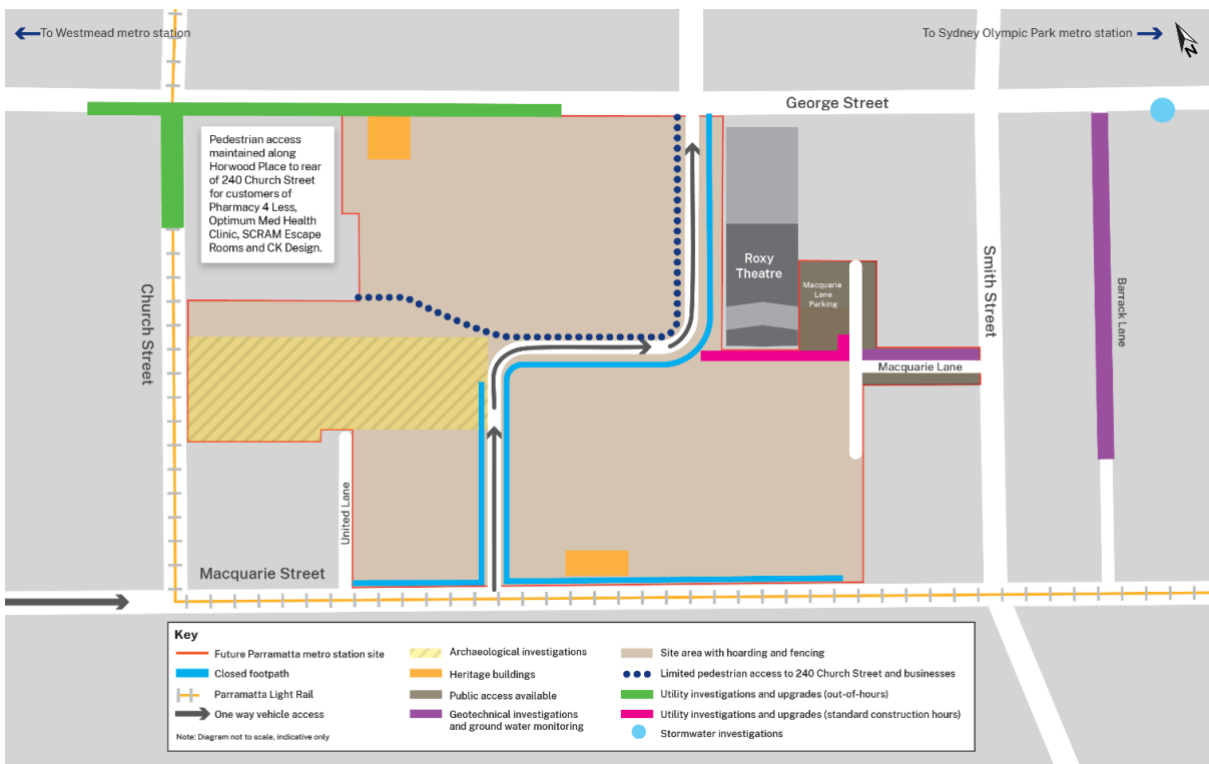

Changes to traffic, parking and pedestrian routes:

Property and driveway access will be maintained at all times, unless arrangements are made with you in advance. To facilitate access to work areas and safely operate machinery, there will be periods of:

- Temporary removal of parking during utility upgrades and investigation work on George Street near Church Street and Barrack Lane, and Macquarie Lane.
- Temporary signage and traffic control in place to assist motorists, pedestrians and cyclists with changes to traffic conditions. Allow some extra time for your journey when travelling near these areas.

Equipment used: Equipment for this work will include but is not limited to hand tools, cranes, generators, truck and dogs, survey equipment, light vehicles, drill rigs, excavators, dozers, vibratory rollers and compactors, concrete agitators, vacuum excavation trucks, tipper trucks, delivery vehicles, fencing, road saw and traffic control devices.

Parramatta metro station work areas:

Contact us

Please contact Olivia from GLC's Community team on **1800 612 173** or by email if you have any questions, complaints or would like to provide feedback about the work, including appropriate respite periods. We will continue to keep you updated on the progress of work in your area.

If you would prefer to receive updates by email, please send a request to metrotunnelsGLC@transport.nsw.gov.au and we will add you to the distribution list. Thank you for your cooperation while we complete these essential works.
