

Monthly construction update – Orchard Hills

February 2023

Sydney Metro is Australia's biggest public transport project.

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the 23-kilometre new railway will connect the Western Sydney Aerotropolis in the south with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

CPB Contractors and United Infrastructure Joint Venture (CPBUI JV) was awarded the Surface and Civil Alignment Works contract for Sydney Metro – Western Sydney Airport in March 2022.

Work in February will include:

- Earthworks for the Stabling and Maintenance Facility
- Geotechnical and contamination investigations, and vegetation maintenance
- Fencing of the project alignment from Lansdowne Road to Patons Lane
- Deliveries of sandstone and spoil to the Stabling and Maintenance Facility
- Fortnightly aerial land surveys of the surface alignment to inform the construction design and planning of the project.

What to expect:

- Work will be completed during standard construction hours **Monday to Friday 7am to 6pm and Saturday 8am to 1pm**. Surrounding residents and businesses will be notified in advance of any likely out-of-hours work
- An increase in heavy vehicles entering the Stabling and Maintenance Facility site via Patons Lane off Luddenham Road
- Increased vehicle movements on surrounding roads.

Out-of-hours work:

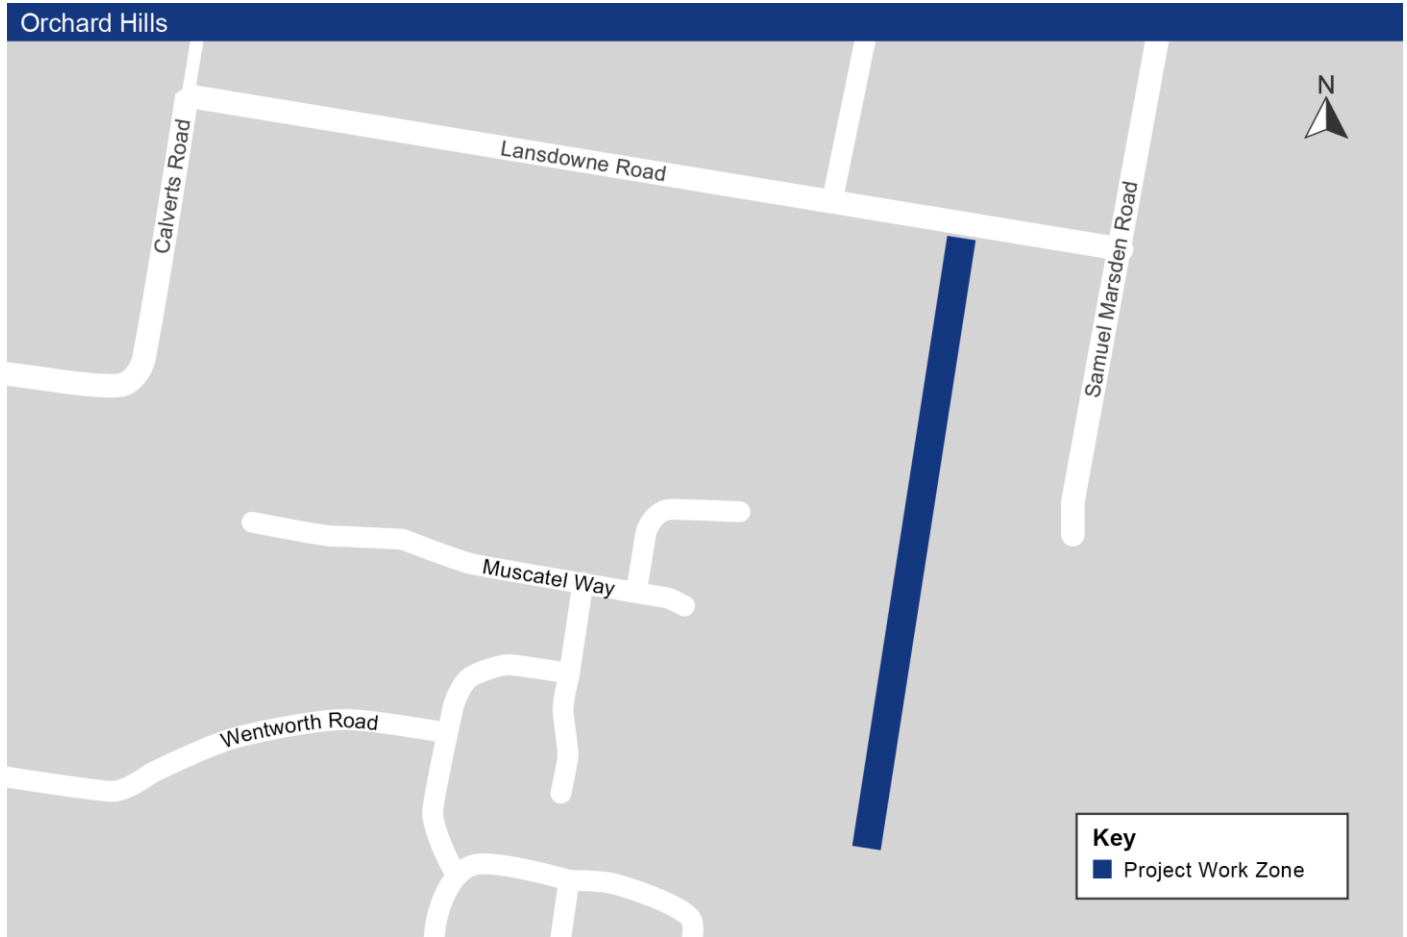

The project team may need to carry out spoil deliveries to the Stabling and Maintenance Facility outside of standard construction hours from February 2023 through to August 2023. The work is not expected to be noisy. We will contact any directly impacted residents regarding this work. If you have any questions or would like to provide feedback regarding this out-of-hours work, please call 1800 717 703 or email sydneymetrowsa@transport.nsw.gov.au.

Equipment used:

Equipment for this work includes but is not limited to survey equipment including marker pegs and pickets, flagging, hand tools, mobile drill rig, excavator, backhoe, trucks, vacuum truck, portable toilets, temporary shipping containers, light and heavy vehicles, water carts, grass slasher, surveying drone and drone remote control.

Please see maps overleaf showing work locations.
