

Out-of-hours work notification – Barangaroo Station

February 2023

Sydney Metro is Australia's biggest public transport project

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown, with new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central.

By 2030, Sydney will have a network of four metro lines, 46 stations, and 113km of new metro rail.

BESIX Watpac has been awarded the contract to build Barangaroo Station. BESIX Watpac will deliver the station fit-out and associated landscaping and civil works, including the re-alignment of Hickson Road.

Systems Connect (an unincorporated joint venture between CPB Contractors and UGL Limited) is delivering line-wide work which includes installing metro rail track, power systems, communications, and infrastructure to turn the excavated tunnels into a working railway between Chatswood and Sydenham.

Upcoming out-of-hours work (OOHW) – Connection of temporary footpath bridge to existing footpath at Nawi Cove, and foreshore footpath closure

BESIX Watpac has been preparing for a pedestrian footpath detour in front of the Cutaway at Nawi Cove and needs to connect a temporary bridge structure to the existing footpath. To carry out this work, on Tuesday 14 February, the foreshore footpath will be closed between Crown Towers to just before the entrance to the Cutaway at Nawi Cove, between the hours of 9pm Tuesday 14 February up to 5am on Wednesday 15 February.

The work will involve installing timber ramps to connect the footpath to the new temporary walkway. Due to the location of the work, it is not possible to undertake this work during standard construction hours as the work requires a full closure of the footpath in front of the Cutaway which is too disruptive during the day. We do not expect this work to be noisy.

What to expect

- Temporary lighting may be used to ensure a safe work site and will be directed away from properties
- There will be pedestrian management controls onsite to aid pedestrians
- Equipment to be used will be hand tools (battery screw drivers, other non-electric tools) and a light vehicle
- Pedestrian access to the foreshore will be diverted via High Steps and Barangaroo Reserve
- The work will not be noisy.

Pedestrian detours during the foreshore path closure

There will be **no pedestrian access between the northern corner of Crown Towers and just before the entrance to the Cutaway at Nawi Cove between the hours of 9pm and 5am the following day**. Pedestrian access to the Barangaroo headland foreshore and to the Cutaway will remain available via High Steps and Barangaroo Reserve.

Directional signage will be in place for the safety of workers and the community. Please refer to the map on the following page for details about the pedestrian detours, including accessible detours.
