

Out-of-hours work lookahead – Five Dock

July - September 2023

Sydney Metro is Australia's biggest public transport project

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres. Sydney Metro has been granted planning approval to construct twin underground rail tunnels between Westmead and Hunter Street in the Sydney CBD for Sydney Metro West.

Acciona Ferroviaria Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations, including a station at Five Dock.

Out-of-hours work at Five Dock

Some activities such as utility investigation work or work on busy roads must be carried out at night for the safety of workers, motorists and pedestrians. Please see below an overview of potential out-of-hours construction work at Five Dock for the next three months.

Activity	Location	Noise Impact	July 2023	August 2023	September 2023
Oversize equipment deliveries/removals	Eastern construction site	Medium	2 nights	3 nights	3 nights
Oversize equipment deliveries/removals	Western construction site	Medium	1 night	1 night	1 night
Water supply pipe upgrade	Great North Road next to western construction site	High	3 nights	4 nights	2 nights
Environmental management emergency work	Eastern and western construction sites		Only required in case of emergency		

Please note multiple activities will occur on the same nights. We plan to carry out work in one area for no more than three nights per week, with only two consecutive nights per week and no more than ten nights per month.

Mitigation measures

Depending on the type of work and expected impacts, a range of mitigation measures may be used such as completing the noisiest work before midnight, installing noise blankets around the worksite, implementing respite periods or providing alternative accommodation.

The project team will liaise with directly affected residents to provide more information and discuss mitigation options before the work. Separate notifications will be issued for all out-of-hours work activities.
