

# Monthly update – Clyde and surrounds

25 August 2023

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Gamuda Australia and Laing O'Rourke Consortium (GLC) has been awarded the contract to deliver nine kilometres of twin metro rail tunnels between Westmead and Sydney Olympic Park, excavation for two new metro stations, a stabling and maintenance facility at Clyde and a precast facility at Eastern Creek.

## Construction activities: September 2023

Tunnelling contractor, GLC will continue major construction at the Clyde site during September. These activities will be carried out during standard construction hours:

- **Monday to Friday 7am to 6pm and Saturday 8am to 6pm.**

Work will involve:

- Earthworks, vegetation clearing and removing waste materials
- Surveying, geotechnical investigations and groundwater monitoring onsite and in nearby streets
- Installing, relocating and decommissioning utility services within the site and surrounding streets
- Constructing bridges over A'Becketts and Duck Creek involving piling, installing formwork, concrete pours and excavation
- Constructing a retaining wall within site boundaries along the Western Motorway (M4) embankment
- Constructing the dive structure and tunnel portal, involving excavation, formwork, concrete pours
- Constructing Unwin Street realignment within site boundaries.
- Constructing segment shed at Rosehill Service Facility
- Aerial drone surveys in and around the site (in line with Civil Aviation Safety Authority guidelines)
- Delivery of machinery, equipment and materials to the site.

## Out-of-hours work

To minimise interruption to local traffic and to ensure the safety of motorists, pedestrians and workers around the site, some work must be undertaken outside standard construction hours.

Out-of-hours work will involve:

The following works are scheduled to take place **24 hours a day, Monday to Sunday:**

- Roadheader excavation and lining of connecting tunnels at Clyde dive site, ongoing until **late 2023**.
- Excavation and lining of mainline tunnels until **mid 2025**.
- Delivery of oversized machinery, assembling of equipment and unloading of materials, including spoil stockpiling, ongoing until **late 2023**.
- Duck Creek diversion works during low tide involving earthworks and excavation has been extended until **mid-October 2023** due to scheduling adjustments.
- Constructing foundational beams for bridges over A'Becketts and Duck Creek involving steel fixing, formwork and concrete pours between **4am and 7am until late 2023**.
- Constructing a retaining wall along the Western Motorway (M4) embankment including earthworks, piling, concrete pours and upgrading utility services at the Clyde Maintenance and Stability Facility from **7am to 6pm on Saturdays and Sundays until late 2023**.

Out-of-hours activities are in line with Road Occupancy Licence and Transport for NSW requirements to work in the road corridor and movement of oversized vehicles.

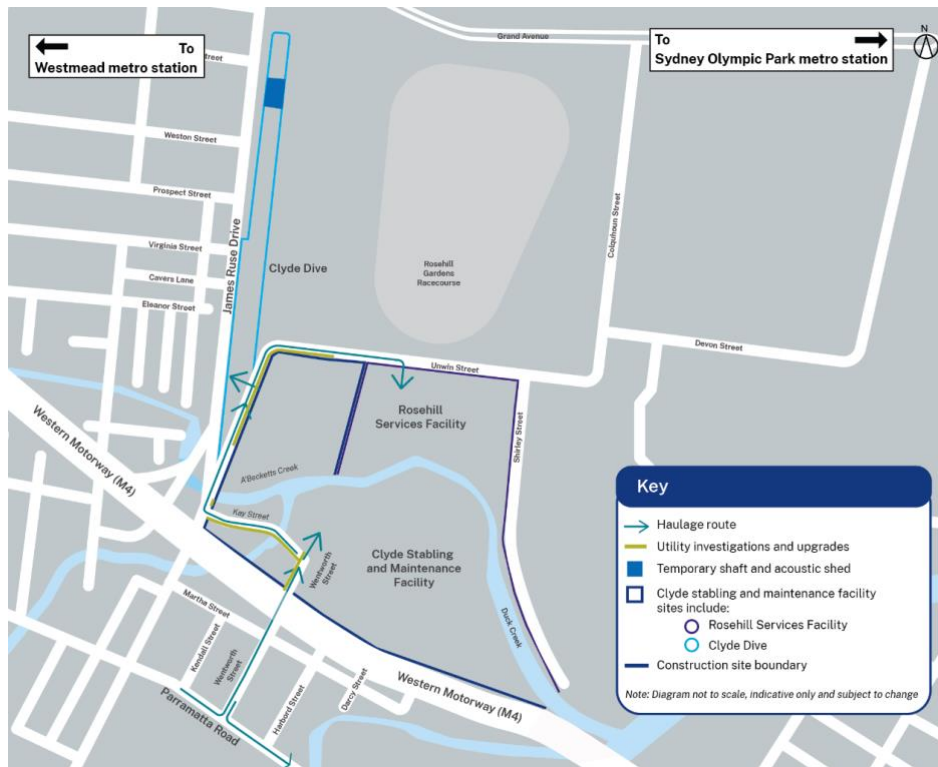

At times, low impact concreting work may extend beyond standard construction hours during weekdays. Finishing works using hand tools may be required. Maintenance work will continue on utility assets around the Clyde site and will be notified separately.

### What to expect

- Some activities will generate noise and this will be minimised as much as possible.
- Access to property and businesses will be maintained at all times.
- Traffic control and signage to assist motorists, pedestrians and cyclists with changes to traffic conditions, including contraflow, boom gate operations, temporary barriers, stop-slow traffic control.
- Temporary removal of parking in stages during utility works around the site.

**Equipment used:** will include but is not limited to hand tools, cranes, piling rigs, generators, roadheaders, bolting rigs, trucks and dogs, dump trucks, survey equipment, light vehicles, drill rigs, dust scrubbers, compressors, excavators (including hydraulic hammer and pulveriser attachments), dozers, shotcrete machines, concrete agitators, concrete pumps, vacuum trucks, tipper trucks, vibratory roller, chainsaws, mulchers, road saw, traffic control devices and a line-marking truck.
