

# Notification – Bringelly

17 August 2023

## Sydney Metro is Australia's biggest public transport project.

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the 23-kilometre new railway will connect the Western Sydney Aerotropolis in the south with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

CPB Contractors Ghella are completing the station boxes and tunnelling works for Sydney Metro – Western Sydney Airport.

## Out-of-hours work

Some out-of-hours work activities will be carried out to mitigate quality and safety risks, and in line with the project Environment Protection Licence, Road Occupancy Licences, and Transport for NSW requirements.

Work in the shaft is continuing during standard construction hours and includes installation of bar reinforcement, formwork installation, and concrete deliveries including use of a boom pump at the base of the shaft.

Out-of-hours work in the shaft will include bar reinforcement installation with a crawler crane positioned on the surface. Please see the map overleaf for the work location. The work will be carried out between **28th August 2023 to 27 October 2023, 24 hours a day, seven days a week**, weather and site conditions permitting.

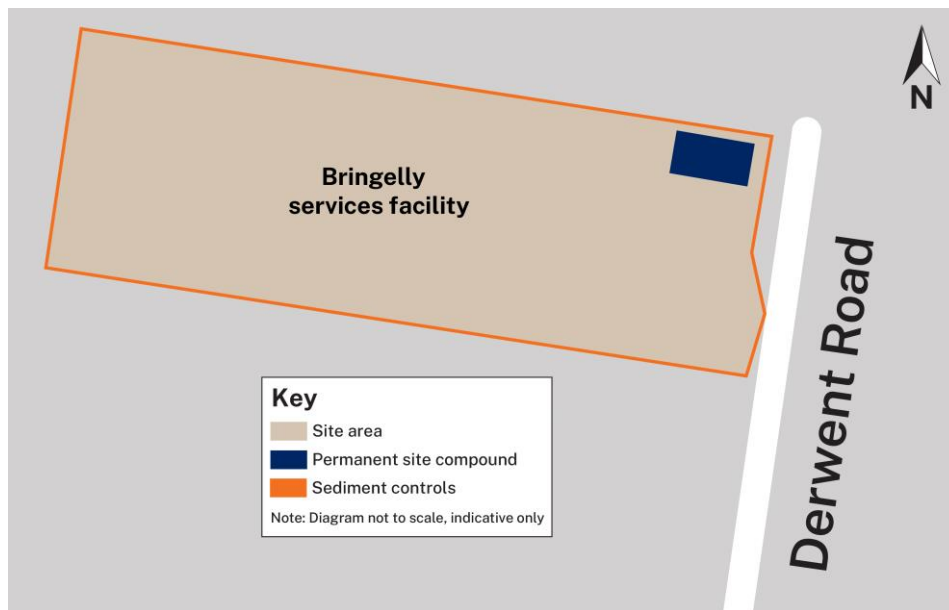

## What to expect:

- Work activities will generate some noise and light impacts. Mitigation measures will be in place to minimise these impacts including noise monitoring and directing any lights away from residential properties.
- High impact noisy work will be carried out during standard construction hours. Out-of-hours work will be low noise impact.
- Increased personnel and additional lighting positioned around the site office, vehicle movements in and around the work area.

## Equipment used

Equipment for this work includes but is not limited to crawler crane, manual power tools, light vehicles and radios.

## Out-of-hours work hours location:

### Feedback:

We invite your feedback on appropriate respite periods or mitigation measures that may be required for your specific circumstances. Contact your local Place Manager, Hayley to discuss your preferences or to be added to the distribution list to receive these updates by email.

CPBG's Community Communications Strategy is available online at [www.cpbcontractors.cc/SBTstrategy](http://www.cpbcontractors.cc/SBTstrategy). Contact us to provide feedback on this plan.
