

Monthly update – North Strathfield

September 2023

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, with a target travel time of about 20 minutes between the two centres.

Sydney Metro has been granted planning approval to construct twin underground rail tunnels between Westmead and Hunter Street in the Sydney CBD for Sydney Metro West. Acciona Ferroviaria Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations, including a station at North Strathfield.

Work during September

Site establishment and excavation work will continue within and around the North Strathfield metro station site during September. The main activities will include:

- Construction of retaining structures such as shotcrete walls and ground anchors
- Excavation of the station box and loading out excavated material
- Nozzle excavation north and south of the station box
- Installation of underground and overhead services for onsite utility connections
- Utility investigation and relocation work along Queen, Pomeroy, Waratah and Wellbank streets
- Adjustments to overhead electrical wires and poles on Queen Street
- Line marking and signage installation work, as well as delivery and removal of oversize equipment
- Crane lifts of oversize equipment into the station box
- Taking readings from previously installed groundwater boreholes

This work will be carried out during standard construction hours:

- Monday to Friday 7am – 6pm and Saturday 8am – 6pm

Work outside standard construction hours

Night work will continue to occur in the work area shown on the map overleaf between **8pm and 5am on Monday, Wednesday and Thursday nights from Monday 11 September to Friday 6 October 2023.**

AFJV will be carrying out utility and concrete barrier installation work, dewatering of the station box and oversize equipment deliveries around the North Strathfield metro station site. This work must occur outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians and workers. Night work will be carried out on no more than two consecutive nights, no more than three nights per week and no more than 10 nights per month at any one location.

What to expect

- There may be some noise associated with the work but we will try to minimise this as much as possible
- Property and business access will be maintained at all times
- Noise blankets will be used to minimise disturbance during night work
- There will be no disruption to supply of utility services
- Saw cutting and hammering work will be completed by midnight for night work

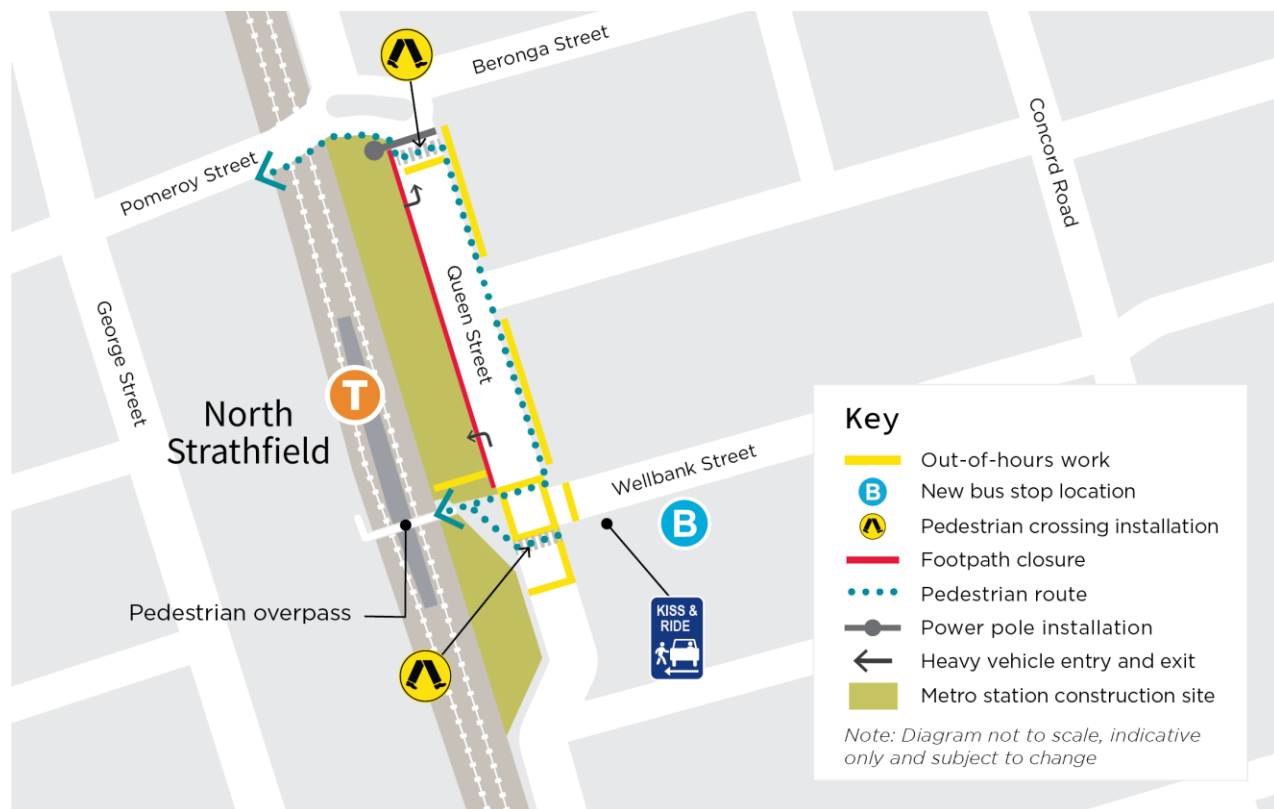

Equipment used

Equipment used for this work includes but is not limited to: trucks, light vehicles, excavators, graders, rattle guns, watercarts, concrete saws, bobcats, jack hammers, vacuum trucks, vibratory rollers, cranes, piling rigs, elevated work platforms, concrete trucks/pumps, street sweeper and hand tools.

Changes to traffic, pedestrian and cyclist routes:

Traffic control will be in place to assist motorists, pedestrians and cyclists at entry and exit points to the construction site. The utility investigation work taking place in the surrounding streets will require some temporary footpath closures. Traffic control will be in place so access and two-way traffic can be maintained. Delivery of oversized equipment will mostly occur from Wellbank Street. At times, larger machinery will have to enter or exit Queen Street via Waratah Street due to tight turning conditions at Wellbank Street.

North Strathfield work area

Contact us:

Please contact Liz from the community team on **1800 612 173** if you have any questions, complaints or would like to provide feedback about the work. We will continue to keep you updated on the progress of work in your area. If you would prefer to receive updates by email, please send a request to metrotunnelsAFJV@transport.nsw.gov.au and we will add you to the distribution list.

Sydney Metro has launched Sydney Metro Connect – a new way to stay informed. You can download Sydney Metro Connect on the App Store or get it on Google Play. Thank you for your cooperation while we complete this essential work.
