

# Monthly update – Pyrmont

December 2023

**John Holland CPB Contractors Ghella Joint Venture (JCG) has been awarded the contract to deliver 3.5 kilometres of twin metro rail tunnels between The Bays and Hunter Street and excavate the Pyrmont and Hunter Street metro stations.**

In December, we're building a tower crane in our Pyrmont East site and continuing site establishment across both sites. This work includes ground strengthening activities, hammering and excavation in preparation for acoustic shed construction in early 2024.

## What work are we doing?

Throughout December, work will include:

- Building a tower crane in Pyrmont East site
- Installing permanent ground support including piling along Union Street
- Excavating and rock hammering
- Installing steel and pouring concrete
- Installing ground monitoring in local streets
- Utility relocation work along Union Street
- Adjusting existing site hoarding
- Surveying monitoring equipment
- Delivering equipment and machinery to and from the worksite and removing spoil and materials.

## When and where we'll be working

We'll be working at our Pyrmont East and West sites, and in local Pyrmont streets. Standard working hours are between 7am to 6pm, Monday to Friday and 8am to 6pm, Saturday.

Building the tower crane will take place between 6am and 6pm, Saturday 9 and Sunday 10 December 2023.

Work activities are subject to ground and weather conditions and may be rescheduled, if required.

Updates to the construction program are provided in our weekly Pyrmont email updates. You can subscribe to these updates by emailing:

## Equipment used

Equipment may include but is not limited to; piling and drill rigs, cranes, vacuum trucks, excavators, hand tools including jack hammers and rattle guns, construction vehicles, elevated work platforms, lighting towers, traffic control equipment and generators.

## What will this mean for you?

During construction, you may notice:

- Periods of increased noise, vibration and dust
- Presence of construction workers and vehicles
- Traffic controllers and traffic management
- Temporary footpath, lane and road closures
- Pedestrian and cycling detours.

## Managing our impacts

Construction activities may generate increased noise and vibration and will be mitigated on site, where possible.

We aim to reduce impacts on the community and the environment by:

- Implementing regular respite breaks for high-noise activities
- Scheduling high impact activities during standard construction hours
- Using onsite dust suppression such as water cannons, misters and hoses
- Directing lighting away from properties.

## Out-of-hours work

Some work is required outside standard construction hours to minimise impacts on traffic and to ensure the safety of pedestrians, motorists and workers.

Out-of-hours work will take place between **6pm and 5am Monday to Friday**. Any high noise activities such as saw cutting and jack hammering will finish by midnight.

Work may include:

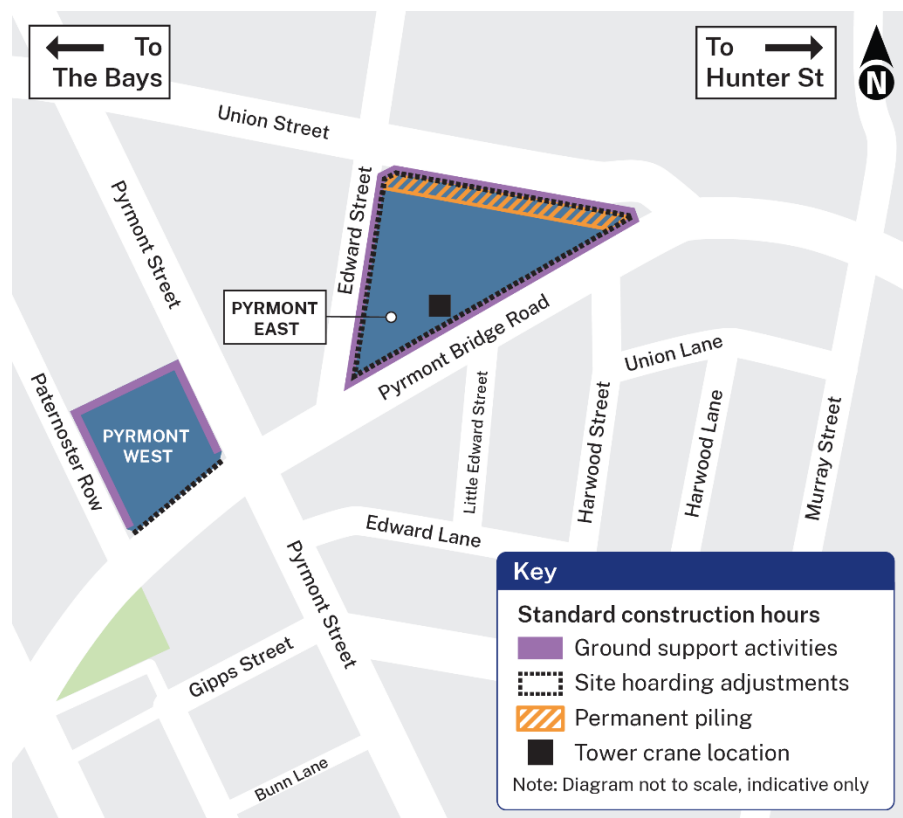

- Utility work
- Installing above ground monitoring equipment around local streets in Pyrmont
- Building Pyrmont East tower crane
- Traffic management work including line marking
- Installing building monitoring devices
- Adjusting existing site hoarding
- Delivering oversized equipment and machinery.

## Work during the holiday period

Eastern Tunnelling Package wishes you a safe and happy holiday.

Pyrmont construction sites will be closed between Friday 22 December 2023 and Tuesday 2 January 2024 for the holiday period.
