

# Monthly update – Sydney Olympic Park

27 December 2023

## Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, link new communities to rail services and support employment growth and housing supply.

Sydney Metro has been granted planning approval to construct twin underground rail tunnels between Westmead and Hunter Street in the Sydney CBD for Sydney Metro West. Acciona Ferrovial Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between the Bays and Sydney Olympic Park and excavate five new metro stations, including a station at Sydney Olympic Park.

Gamuda Australia and Laing O'Rourke Consortium (GLC) has been awarded the contract to deliver nine kilometres of twin metro rail tunnels between Westmead and Sydney Olympic Park and excavate for two new metro stations.

## Construction activities: January 2024

Excavation is now complete at the Sydney Olympic Park Metro Station site. Preparations will continue for the arrival of two tunnel boring machines (TBMs) from Clyde in mid-2024. Another two TBMs are tunnelling from Rozelle and expected to reach Sydney Olympic Park during the second half of 2024. The work activities below will be carried out during standard construction hours:

- **Monday to Friday 7am to 6pm and Saturday 8am to 6pm**

Work during January includes:

- Delivery and removal of plant and equipment
- Groundwater well monitoring outside the site boundary (refer to map overleaf)
- Footpath and road restoration work
- Site establishment work including construction of the GLC site office
- Concrete pours and waterproofing inside the excavated station box
- Installing and monitoring of survey prisms within local streets and around the site.

## Out-of-hours work

To minimise interruption to local traffic and to ensure the safety of motorists, pedestrians and workers around the site, some work must be undertaken outside standard construction hours. Oversized machinery and equipment deliveries to the site may occur **between 6pm and 7am from Wednesday 3 January to Wednesday 31 January 2024.**

### What to expect:

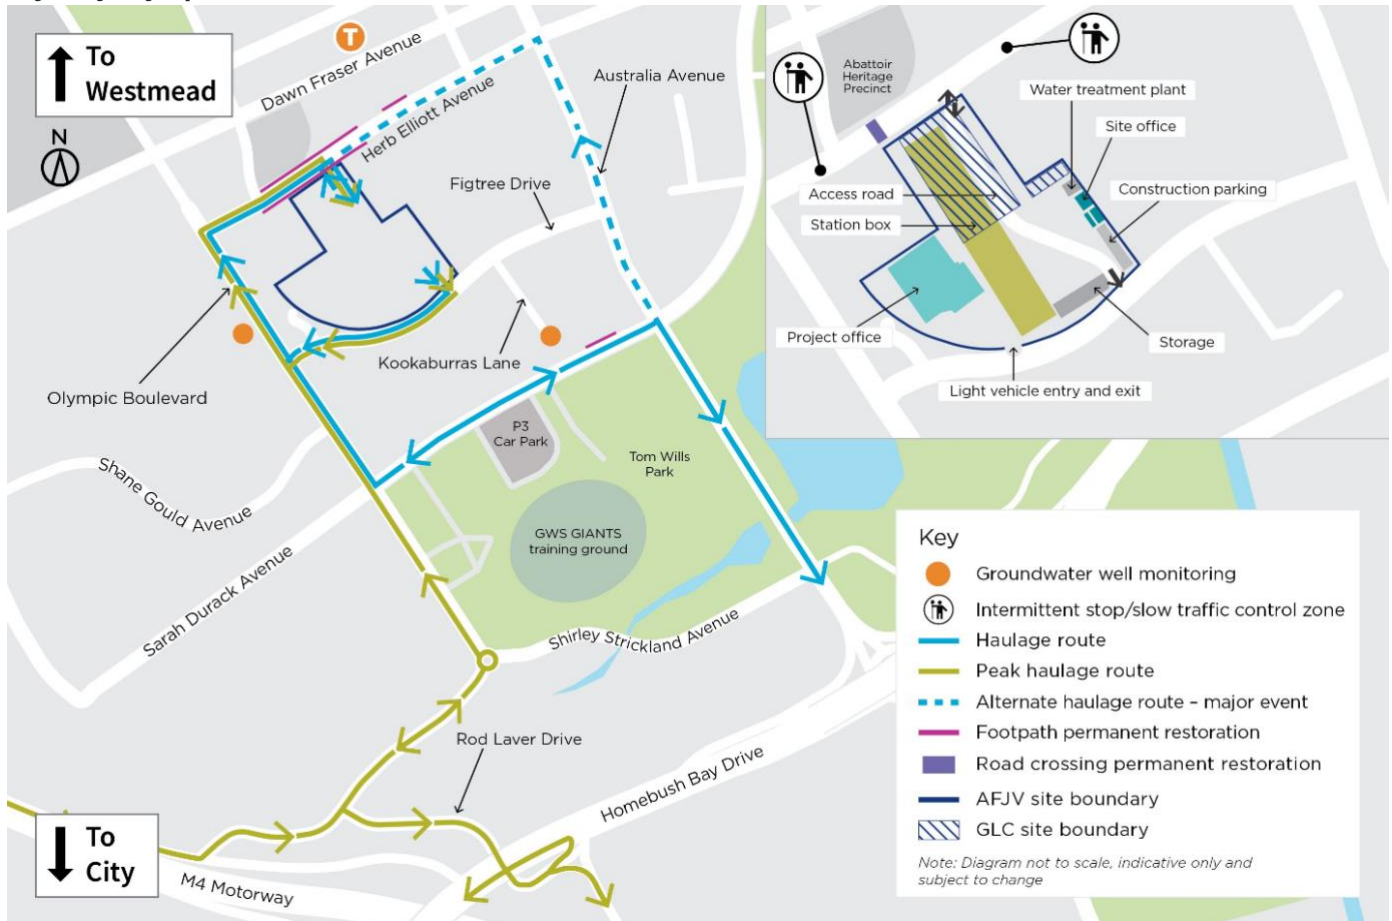

- There may be some noise associated with the work but we will try to minimise this as much as possible
- Property and business access will be maintained at all times

**Equipment used:** includes (but is not limited to) excavators, elevated work platforms, lighting towers, concrete pump, grout pump, dozer, water cart, sweeper truck, anchoring rig, CCTV truck, concrete saws, rock saw, road saw, generator, vacuum truck, tilt trays, scrubber fan, bobcats, jack hammers, small tools, trucks and light vehicles.

## Changes to traffic, pedestrian and cyclist routes

Traffic control will be in place to assist motorists, pedestrians and cyclists at entry and exit points to the construction site. The footpath and road restoration work will require some temporary lane closures. Traffic control will be in place so access and two-way traffic can be maintained. Heavy vehicles will access the site during standard construction hours using the approved haulage routes.
