

City & Southwest

Notification – Campsie

February 2024

Sydney Metro is Australia's biggest public transport project.

By 2030, Sydney will have a network of four metro lines, 46 stations and 113km of new metro rail.

Sydney Metro is revolutionising how Australia's biggest city travels, connecting Sydney's north west, south west and greater west to fast, reliable turn-up-and-go metro services with fully accessible stations.

Passenger services from Chatswood to Sydenham will commence in mid-2024, then onto Bankstown in 2025.

In February, work will continue along the corridor and at Campsie Station (weather and site conditions permitting). Work will be undertaken during standard construction hours, Monday to Friday 7am-6pm and Saturday 8am-6pm. You may also notice an increase in plant and materials being removed from our sites as contractors change over along the alignment.

Location	Details of work during standard construction hours (daytime)
Campsie (along the rail corridor)	 Site investigations, surveys and associated activities Mobilisation and demobilisation of plant and materials De-vegetation and tree clearing throughout the rail corridor where required Work related to security fence installation Modification to the Duke Street footbridge, including a temporary closure, with a pedestrian detour via Beamish Street Work related to security fence installation Parking removal and lane closures to facilitate plant/truck operation, parking and access at various locations along the corridor Installation of cables and trackside equipment
Around Campsie Station	 Installation of encasement for cable containment between platform 2 and Lilian Lane Installation of equipment, cables, cable tray and cabinets in station rooms and buildings Defect rectification as required
Services building site at Lilian Lane opposite Dewar Street	 Installation of roller shutters inside the services building Ongoing termination and cabling work at the services building
Substation site (Off Lilian Street)	 Installation of equipment, cables and cable supports as well as mechanical and electrical fitout inside traction substation building Landscaping including planting and maintenance of new trees and shrubs Traffic control to facilitate truck movements on Lilian Street, as required Operation of transformers for testing and commissioning purposes, 24 hours/day Operation of generators for testing and commissioning of padmount transformers during weekdays, standard hours Cabling, mechanical and electrical fit-out and finishing works for padmounts, including testing

Out-of-hours work

Due to the nature of some activities and for the safety of workers, some work will occur outside standard construction hours, when trains are not running. Some equipment will also be delivered outside standard construction hours in line with Transport for NSW requirements for the movement of oversized vehicles. Properties close to scheduled work will be notified prior to work starting. Planned out-of-hours work is detailed in the table over the page.

Date / time	Details of out-of-hours work
Upcoming rail possessions: Saturday 3 February to Sunday 4 February 2024 Saturday 17 February to Sunday 18 February 2024 (24/7 work)	 Site investigations, surveys and associated activities De-vegetation and tree clearing around the rail corridor where required Mobilisation and demobilisation of plant and materials including preparatory activities for upcoming out-of-hours work Work related to overhead wiring upgrades Work related to the segregation and security fence installation within the rail corridor Modifications to the Duke Street footbridge including temporary closure with pedestrian detour via Beamish Street Parking removal and lane closures to facilitate plant/truck operation, parking and access at various locations along the corridor Work related to the combined services route within the corridor Internal work and installation of brackets and containments on station platform Operation of generators for testing and commissioning of padmount transformers, 24 hours/day Testing and commissioning of new communications and signalling systems Installation of equipment, cables, cable tray and cabinets in station rooms and buildings Installation of cables and trackside equipment along the rail corridor
Mid-week work between 6pm and 7am (for no more than 3 nights per week)	 Site investigations, surveys and associated activities Mobilisation and demobilisation of plant and materials including preparatory activities for upcoming out-of-hours work

Equipment used for the above work will include heavy machinery (including but not limited to excavators, trucks, hi-rail vehicles, hydraulic ram, jack hammers, vacuum trucks, slashers, motorised saws, concrete trucks, elevated work platforms, concrete pumps, cranes, cable pulling equipment, road sweeper, compactors, lighting towers, forklifts, chainsaws, and water carts), and hand and power tools.

Access to buildings and driveways will be maintained at all times. Some of this work may be noisy, however we will take every possible step to minimise noise such as switching off equipment when not in use and using non-tonal reversing beepers.

Keeping you informed

Properties close to scheduled work will receive notifications when construction work is scheduled to occur. You can contact us on **1800 171 386** (24 hour community information line). If you have questions about the **substations** please ask for **Alana/Grace** or email LinewideMetro@transport.nsw.gov.au. For all other work please ask for **Julian** or email SouthwestMetro@transport.nsw.gov.au.

Thank you for your cooperation while we complete this essential work.
