

Project Update – Crows Nest Station

January 2025

Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. On 19 August 2024, services began on the new section of the M1 Line, including 15.5 kilometres of metro rail extending from the existing Metro North West at Chatswood, under the harbour and through the Sydney CBD and onto Sydenham. Commuters can now catch metro services every four minutes in the peak from new stations at Crows Nest, Victoria Cross, Barangaroo, Martin Place, Gadigal and Waterloo, and new metro platforms at Central.

While all city stations are now open, commuters will notice hoarding and minor ongoing work in the precinct areas at most new stations. This work largely involves improvements to roads, footpaths and traffic intersections.

Remaining work activities

The major precinct and over-station development works at Crows Nest are now complete. Minor completion and rectification work will continue into January at the Hume and Oxley Street intersections on Pacific Highway, as well as in small areas along Clarke Street and Pacific Highway.

This work involves adjusting kerbs, bollards, electrical pits, drainage valves and culverts, removing temporary asphalt and concrete footpath sections and ramps so that they can be re-built and paved, then grouted, washed and sealed. **This work will be staged to ensure that one of the two east-to-west/ west-to-east crossings always remains open.**

Paving work and adjustments to drainage is expected to occur throughout January and will be during standard construction hours (**7am to 6pm Monday to Friday and 8am to 6pm on Saturday**). It may be noisy at times.

The removal, reconstruction and cleaning and sealing seal of pram ramps at the Oxley and Hume Street crossings, drainage culvert at the corner of Oxley Street and Clarke Street, and the bollard replacement work along the eastern side of Pacific Highway will be conducted at night between **7pm and 5am** the following morning. These works are scheduled for **Wednesday 8, Thursday 9, Sunday 12, Monday 13, Wednesday 15, and Thursday 16 January**, with contingency dates of **Sunday 19, Monday 20, Wednesday 22, and Thursday 23 January**.

Additional cable pulling will also be carried out at night in January. This work will be carried out at night at between **7pm and 5am** on dates listed above and will occur between the intersection of Shirley Road and Falcon Street, and Albany Street.

12-month defect and liability period

A W Edwards has a 12-month defect and liability period, during which time additional rectification works may be required. While most of these works are expected to occur during the day, some activities may need to take place at night. A W Edwards will continue to provide seven days' notice ahead of any impactful works.

What to expect

Some of this work will be noisy as it will involve cutting and digging sections of the road and footpath.

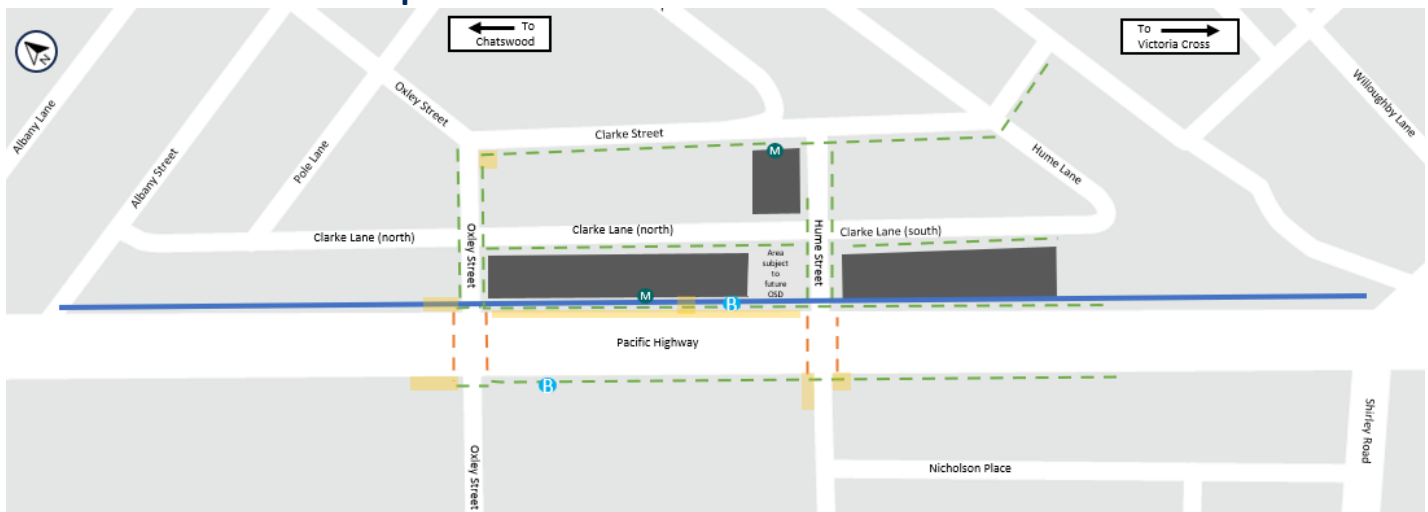

Mitigation measures will be in place to reduce noise including stopping certain high-noise activities, such as saw cutting and hammering at **12 midnight** when working at night, and between **12pm to 2pm** during the day. High-noise activities will also not occur between **7am and 8am**.

Works may continue past 12 midnight and occur between 7am to 8am and 12 to 2pm, but these will be lower impact activities, such as concrete pouring, trenching with an excavator, road compacting, and the use of a vacuum truck.

Access for pedestrians, cyclists, and motorists will be managed through signage and traffic control. Detours and temporary parking restrictions may be necessary, and advance notice of these changes will be provided.

Please note: non-intrusive works may occur during respite periods and outside standard construction hours without prior notice.

Work area and access map
