# Notification – Orchard Hills Metro Station and the Stabling and Maintenance Facility

## Sydney Metro is Australia's biggest transport project.

## July 2025

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the new 23-kilometre metro railway will connect Bradfield city centre with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

Parklife Metro consortium is delivering the Stations, Systems, Trains, Operations and Maintenance (SSTOM) works. See the list below for the work activities at Orchard Hills during July.

## What's new in July?

- delivery and installation of precast concrete beams
- tree removal on Kent Road and corner of Lansdowne Road.

## Stations, Systems, Trains, Operations and Maintenance work includes:

#### **Orchard Hills Metro Station:**

- formwork, steel fixing and concrete pours inside the station box
- tunnel fit-out works
- construction of internal blockwork walls inside the station box
- surveying and geotechnical investigations, including potholing, non-destructive digging and testing along local surrounding roads to inform utility designs
- road surface and restoration work, including filling in potholes on Kent, Lansdowne Road and other local roads
- delivery of over-sized equipment, machinery and materials.

### Stabling and Maintenance Facility:

- major earthworks including importing materials, excavations, constructing permanent basin, and compacting for the rail areas
- construction of a new 132kV powerline, connecting the substation to the Endeavor Energy Switching Station at Patons Lane
- major drainage works including excavations, installing pits and pipes and backfilling
- site-wide concrete works, including formwork, steel fixing for various structures such as the substation, maintenance administration building, operations control centre, and across the site
- combined services route and trunk services installation
- continuation of works on the access road
- installation of steel structures and blockwork
- Mechanical, electrical, plumbing and architectural finishes activities at the substation;
- Commencement of track formation scope
- Cable pulling along Patons Lane towards the substation.

Subscribe for updates at sydneymetrowsa@transport.nsw.gov.au

#### Linewide works – Orchard Hills to Warragamba Pipeline

- ongoing deliveries of rail track, materials, machinery and equipment to the project alignment at Lansdowne Road and Patons Lane. Rail dragging from the surface to the tunnel between Orchard Hills and St Marys and along the mainline between Orchard Hills to Warragamba Pipeline
- installation of cable containment and hydrant pipes on the viaducts and at-grade
- service utility installations and surveying
- concreting and formwork for the Blaxland, Unnamed and Warragamba viaducts and along the mainline between Orchard Hills to Warragamba Pipeline.
- installations of brackets, cable containment and hydrant pipes in the tunnels from Orchard Hills toward St Marys
- combined service route installations
- rail track and drainage installations
- installation of light poles
- ongoing deliveries of materials, machinery and equipment to the site compounds at Kent Road and Lansdowne Road.

#### **Bush Regeneration works**

- inspection and assessment of sites to plan future works
- removal of weeds by hand and using hand tools
- spot spraying of herbicides
- use of chainsaws to cut woody weeds and applying herbicide to the cut surface ("cut and paint" method).

#### Work hours:

#### Standard construction hours are Monday to Friday from 7am to 6pm and Saturdays from 8am to 1pm.

Some work will be required to take place outside our standard construction hours to minimise traffic impacts or to ensure the safety of pedestrians, motorists and our workers. Out-of-hours work activities will be carried out in line with the project Environmental Protection Licence, Road Occupancy Licences, and Transport for NSW requirements.

#### Out-of-hours work includes:

- delivery of over-sized equipment and machinery and materials
- precast beam delivery and installation at Orchard Hills Metro Station
- 24/7 tunnel fit-out activities
- extended work hours for excavation, formwork, reinforcement and concrete pour, steel fixing, concrete pours and concrete finishing works inside the station box at the Orchard Hills site and at the Stabling Maintenance Facility across various structures including the OCC and M&A building
- dewatering activities at the Orchard Hills and Stabling Maintenance Facility sites
- concrete batching plant operations at the Orchard Hills Metro Station site
- construction of a new 132kV powerline on Patons Lane including excavations, trenching and backfilling, cable laying, and installation of utility services
- on-going combined services route (CSR) works and trunk service installation
- concreting and formwork for the viaducts
- rail track installations
- service utility installations and surveying

 road surface and restoration works including filling in potholes on Kent, Lansdowne and other local roads.

Impacted surrounding residents and businesses will be notified in advance of any out-of-hours work.

## What to expect:

- mitigation measures will be in place to minimise impacts including installing noise blankets where feasible, respite periods during high noise activities, noise and vibration monitoring, and water carts for dust suppression
- increased light and heavy vehicle movements on surrounding roads, and local road closures. All vehicles will be turned off when not in use, non-tonal reversing alarms will be fitted to plant and machinery and trucks will avoid reversing into and on site, where feasible
- temporary lighting to ensure a safe worksite will be directed away from properties
- communication will be limited to radios only when moving and unloading equipment, with no use of horns or loud radios
- traffic control and signage to safely assist motorists, pedestrians, and cyclists.
- Livestock should be monitored, as nearby activity may generate noise that could unsettle animals.

## Equipment used:

Equipment used will include, but is not limited to, excavators, cranes, dozers, graders, rollers, vacuum truck, water carts, heavy and light site vehicles, generators, survey equipment, traffic management devices, concrete agitators, pneumatic drills, concrete saws, bobcats, chainsaws, telehandler, hand drill, non-powered hand tools (including hammers), franna, GenSet, light vehicles and powered hand tools.

## Changes to traffic, pedestrian, and cyclist routes:

During these works, traffic control will be in place to assist motorists, pedestrians, and cyclists with any changes to traffic conditions. This may include contraflow, redirecting traffic and stop-slow traffic controls. The time of these changes will vary and are dependent on road authority approvals.

Access to driveways and buildings will be maintained at all times. Residents will be separately notified if access to driveways will be affected, or access to private property is required.

## Feedback:

Detailed Noise and Vibration Impact Statements (DNVIS) have been prepared, including proposed mitigation measures based on noise modelling. Your feedback on appropriate respite periods or mitigation measures is encouraged. The SSTOM Community Engagement strategy is online.

Please visit <u>parklifemetro.com.au</u> to view these documents and contact us to provide any feedback.

If you would prefer to receive updates by email, please let us know via <u>sydneymetrowsa@transport.nsw.gov.au</u> and we will add you to the distribution list.

Thank you for your cooperation while we complete this essential work.

## Work areas:

Stay connected through the Sydney Metro Connect App.

Access information in over 100 languages Download Sydney Metro Connect from the App store<sup>™</sup> or get it on Google Play<sup>™</sup>.
