

Acciona Ferrovia Joint Venture (AFJV) has completed works on Sydney Metro West's central tunnelling package.

Tunnelling complete between The Bays and Sydney Olympic Park

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, transforming Sydney for generations to come.

Acciona Ferrovia Joint Venture (AFJV) was awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations including The Bays, Five Dock, Burwood North, North Strathfield and Sydney Olympic Park.

AFJV have now completed major construction and all sites have been handed back to Sydney Metro for ongoing maintenance and security and to prepare for the next phase of the project.

Sydney Metro and AFJV would like to thank you for your patience while completing major construction activities in your area.

What's next?

Sydney Metro will be undertaking enabling works such as utility relocation across several sites over the coming months to prepare for station construction. Some works will need to be undertaken out-of-hours to minimise disruption to local traffic and ensure the safety of motorists, pedestrians and workers. The community will be notified and appropriate mitigation measures will be offered to those impacted, in advance of any out-of-hours work.

Tunnelling for Sydney Metro West is expected to be complete across the alignment in 2026. This includes sections of the alignment between Westmead and Sydney Olympic Park and between The Bays and Hunter Street in the Sydney CBD.

Procurement for remaining major contract packages is currently underway. Station construction and tunnel fit out for Sydney Metro West is expected to commence from 2027.
