

Notification – Pyrmont

Out of hours work

1 October 2025

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, transforming Sydney for generations to come.

Stations have been confirmed at Westmead, Parramatta, Sydney Olympic Park, North Strathfield, Burwood North, Five Dock, The Bays, Pyrmont and Hunter Street in the Sydney CBD.

Ongoing out of hours work

We are progressing with detailed excavation and profiling in the cavern, along the edge walls of the invert (cavern floor), as well as at the ramps that connect the tunnel alignment at the western and eastern ends of the cavern.

This work has involved progressively trimming and removing hard rock in small sections using an excavator with a hammer attachment, profilers and surface miners. This work will continue to take place intermittently between 7am and 10pm Monday to Saturday and 7am to 6pm Sunday until mid-November 2025. We thank you for your patience during this time.

Changing work hours

From **Tuesday 7 October 2025**, we will temporarily extend our rock hammering working hours to 24 hours a day for up to ten days. At this stage this is only required near our Pyrmont East site between Edward and Pyrmont Street. Please see the map located over the page. Affected properties have been contacted and will continue to receive direct updates as our work progresses.

What will this mean for you?

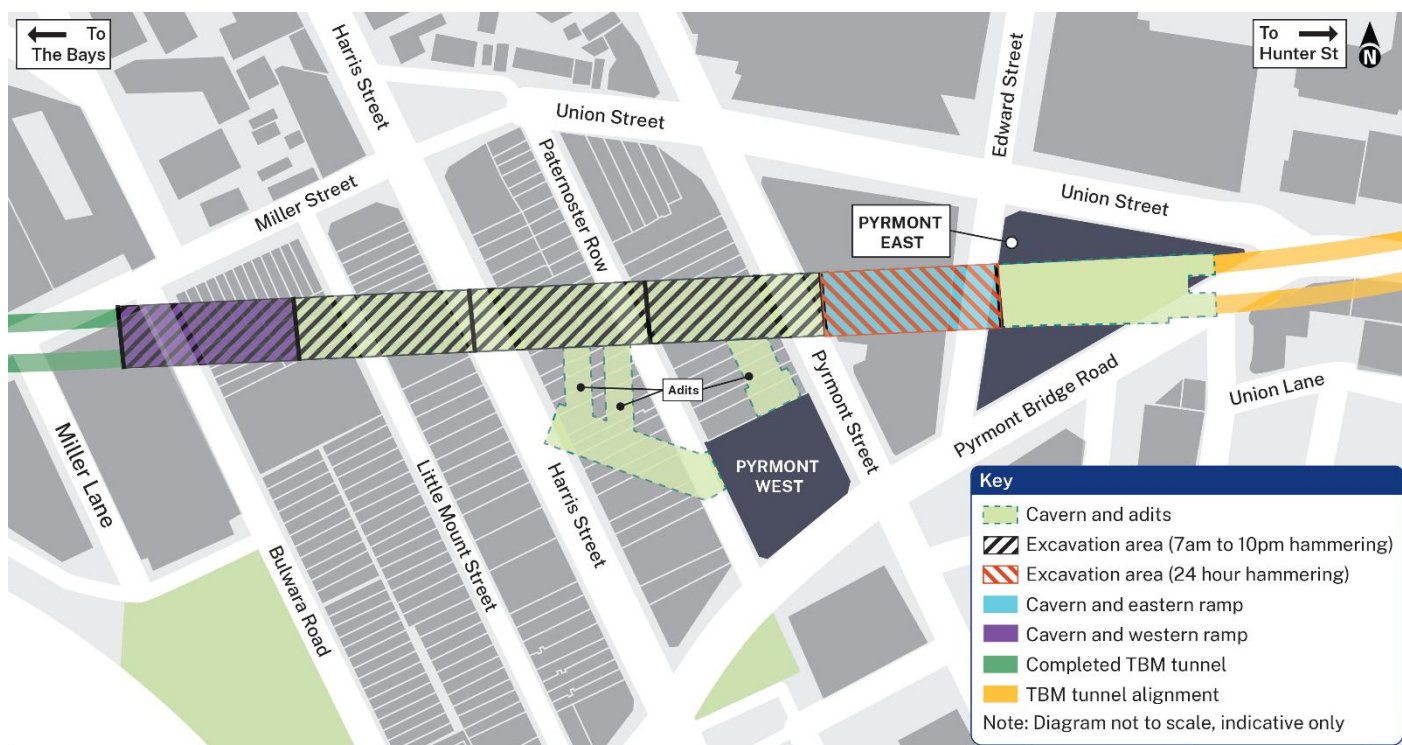

During this time, there may be some groundborne noise generated by vibration that transmits through the ground into a structure. Temporary construction impacts will vary depending on ground conditions, tunnel depth, your building type and existing background noise levels.

Managing our impacts

Construction activities may generate increased noise and vibration and will be mitigated at the work area, where possible. We aim to reduce impacts on the community and the environment by:

- Smaller types and reduced quantity of machinery will be used in the evening, where possible.
- Undertaking regular noise and vibration monitoring to ensure work is carried out within Project approvals.
