

North Strathfield station – Electrical kiosk work

16 January 2026

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, link new communities to rail services and support employment growth and housing supply.

Sydney Metro has engaged Syscon to install a new kiosk substation and undertake associated civil works, as part of ongoing construction for Sydney Metro West. This work involves installing a new kiosk substation within the North Strathfield metro station site and includes associated high-voltage (HV) and low-voltage (LV) connections to existing Ausgrid electrical infrastructure.

Out-of-hours work

Works include installation of low voltage (LV) cables and utility pole and temporary restoration at trenching locations on Queen Street and within the site compound.

To minimise disruption to local traffic and to ensure the safety of motorists, pedestrians, and workers, some work must be undertaken outside standard construction hours.

Friday, 23 January and Saturday, 24 January between 6pm and 7am – Highly impacted residents will be notified separately. There will be no disruption to utility services as part of these works. A map showing the location of works is shown on the next page.

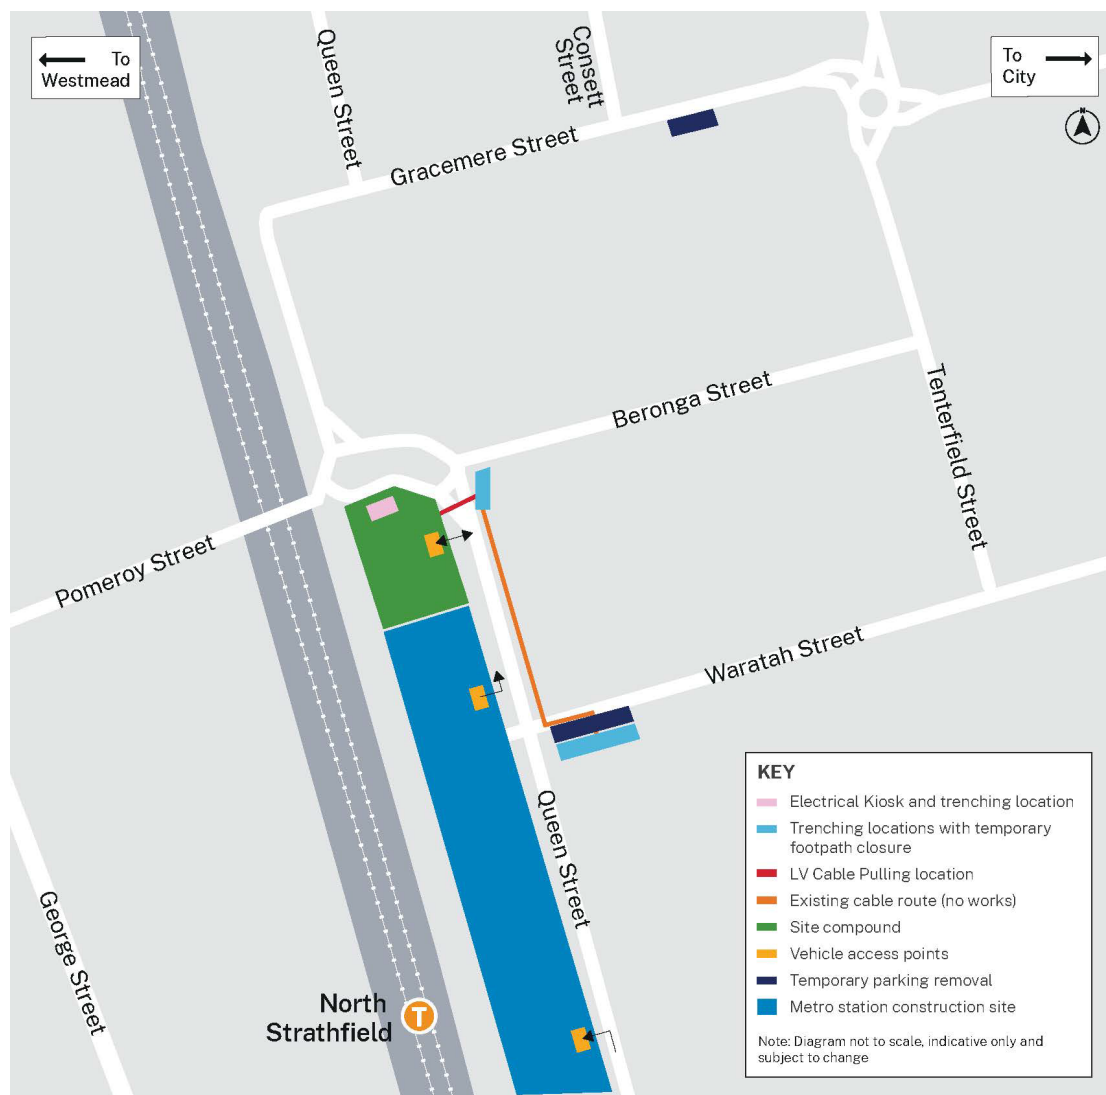

Changes to traffic and pedestrian routes:

To facilitate access to work areas and safely operate machinery, there will be:

- Temporary short-term parking removal on Gracemere Street and Waratah Street
- Temporary short-term footpath closures on Queen Street and Waratah Street
- Traffic controllers and signage to direct pedestrians
- Access to businesses and driveways will be maintained unless prior arrangements are made with affected stakeholders
- Parking will be reinstated and footpaths will be reopened after every working shift.

Equipment used: includes (but is not limited to) elevated work platforms, lighting towers, surveying equipment, excavator, tipper truck, roller, concrete pump, compressors, grinders, rattle guns, welding equipment, water cart, sweeper truck, anchoring rig, vac trucks, concrete saws, generators, tilt trays, bobcats, forklifts, hand tools, trucks and light vehicles.

North Strathfield work area:

Next steps:

There are planned Ausgrid power outage works scheduled to take place on **Monday 2 February 2026** which may affect utility services in the area. This outage is required to remove redundant overhead power lines and power poles and complete private property connections. Affected residents will be notified by Ausgrid directly.

Contact us:

Please contact Julian from the Sydney Metro West community team on **1800 612 173** if you have any questions, complaints or would like to provide feedback about the works.

We will continue to keep you updated on the progress of work in your area. If you would prefer to receive updates by email, please send a request to sydneymetrowest@transport.nsw.gov.au.

Thank you for your cooperation while we complete this essential work.
