

Quarterly update – Eastern Creek

April – June 2026

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, transforming Sydney for generations to come.

Gamuda Australia and Laing O'Rourke Consortium (GLC) has been awarded the contract for the Western Tunnelling Package to deliver nine kilometres of twin metro rail tunnels between Westmead and Sydney Olympic Park, excavation for two new metro stations, a stabling and maintenance facility at Clyde.

John Holland CPB Contractors Ghella Joint Venture (JCG) has been awarded the contract for the Eastern Tunnelling Package to deliver 3.5 kilometres of twin metro rail tunnels between The Bays and Hunter Street and excavate the Pymont and Hunter Street metro stations.

Both contractors share the precast facility at Eastern Creek.

Construction activities: precast facility

The production of concrete segments for Sydney Metro West is now complete. The transportation of materials, demobilisation activities and plant and equipment maintenance are ongoing. These activities will generally take place during standard construction hours, Monday to Friday 7am to 6pm and Saturday 8am to 6pm.

The main activities include:

- Deliveries of materials, equipment, plant and machinery.
- Stockpiling of construction materials and storage of tunnelling support equipment.
- Loading and transportation of tunnelling support equipment.
- Plant and equipment maintenance.
- Demobilisation of plant and equipment, including gantry cranes
- Conversion of the existing temporary settlement basin into a permanent settlement basin, involving earthworks, pipe laying and concreting.

What to expect:

- Access to Lenore Drive and surrounding properties will be maintained at all times
- There will be increased vehicle and truck movements
- The work will generate some noise, and the team will minimise impacts where possible.

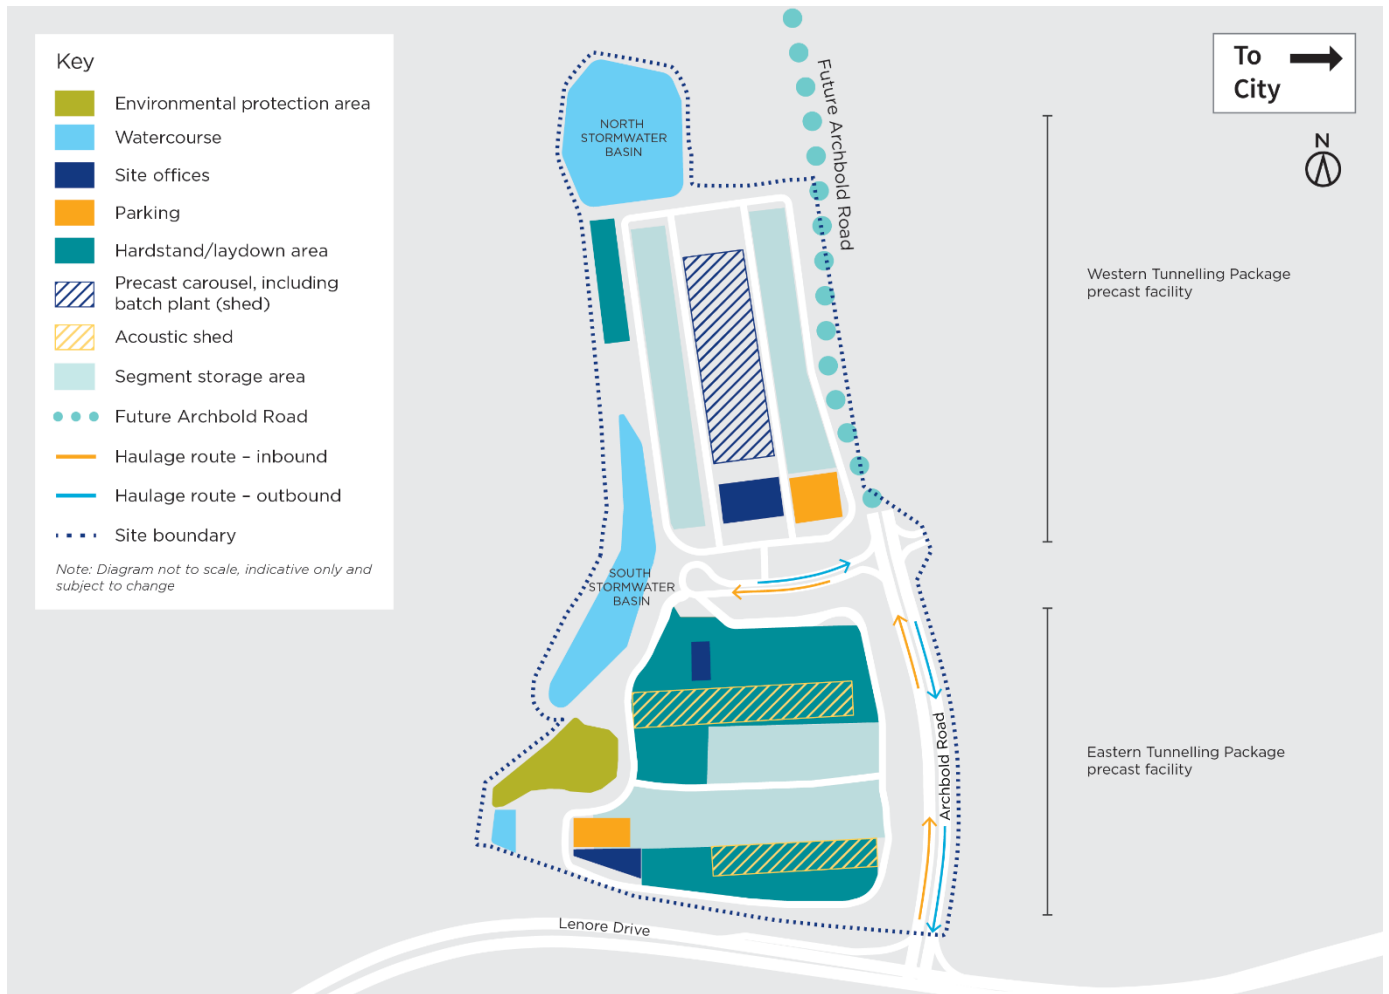

Equipment used:

Equipment used for this work includes but is not limited to, road trucks, concrete trucks and pumps, gantry and mobile cranes, water carts, elevated work platforms, scissor lifts, street sweepers, telehandlers, forklifts, excavators, hand tools, temporary fencing, heavy and light vehicles and generators

Changes to traffic, pedestrian and cycle routes

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists with any changes to traffic conditions.
