

Monthly Notification – Canterbury Station

May 2026

The NSW Government announced that the extension of Sydney Metro services from Sydenham to Bankstown will be completed in the second half of 2026.

Fare free Southwest Link buses will replace trains between Sydenham and Bankstown during this time. You can plan your trip at [transport.nsw.info](https://transport.nsw.gov.au) and on real time apps. Kerbside changes may also be in place around the affected train stations for temporary bus zones. Please check signage before parking your car.

Charles St/Broughton St temporary closure - 20 April 2026 until end of July 2026

To secure the rail corridor and allow for the safe operation of Metro trains, Sydney Metro is installing overheight protection beams near the Charles/Broughton Street rail overpass.

Traffic changes:

To enable this work, a section of Charles/Broughton Street will be closed to vehicular traffic around the rail overbridge. **There will be no access between Charles Street and Broughton Street during this time, entry and exit will be via Canterbury Road only.**

During peak hours, there is no right-hand turn from Canterbury Road southbound into Charles St. During these periods, it is recommended that southbound drivers wanting to access Charles Street turn left onto Close Street, turn around and use the traffic lights to cross into Charles Street.

Other Sydney Metro work during May and June 2026

Work will continue during and outside of standard construction hours within and around Canterbury Station during May and June.

The main activities will include:

- Modification of cable service routes, cables, overhead wire and trackside equipment in the rail corridor, trackside substations and the stations
- Delivery of materials and equipment using light and heavy vehicles and movements of plant and materials
- Installation and energisation of cables and communications equipment across stations, platforms, buildings and gates
- Adjustments to corridor boundary gates, track signal equipment, and related infrastructure
- Dynamic train testing and commissioning activities along the line and at stations, including the use of train horn and PA announcements outside of working hours.
- Public Announcement (PA) performance testing, including emergency-style messages, white noise or static, and announcements that seem louder than usual. Out-of-hour PA testing times will be between 6pm and 2am at all stations. PA announcements will occur intermittently during these times when trains pass through.
- Installation, testing and commissioning of rail corridor security systems including CCTV, foundations, poles, outdoor equipment cabinets, solar panels, cable pits and cable containment
- Site investigations, surveys and associated activities
- De-vegetation and tree clearing throughout the rail corridor where required
- Work related to security and segregation fence installation and signalling
- Parking removal and lane closures to facilitate plant and truck operation around the station and locations along the corridor and at rail access gates
- Work related to overhead wiring and high and low voltage wiring and local utilities
- Work on bridges along the corridor as well as civil, electrical and containment works at station buildings/platforms
- Defect rectification work as required
- Installation of new water mains on Canterbury Road including excavation on surrounding streets
- Reinstatement of Canterbury Road including asphaltting, footpath construction and kerb / gutter installation
- Continued footpath closures on Canterbury Road and occupation of parking spaces on Close Street for material storage
- Out of hours work on Canterbury Road between Close Street and Tincombe Street

Hours of work

Standard construction hours are Monday to Friday 7am – 6pm and Saturday 8am – 6pm excluding Public Holidays and Sundays. Some activities must be undertaken outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians and workers. Respite hours will be implemented in line with the project's approvals. Highly impacted residents will be notified separately.

What to expect

- Equipment used includes, but is not limited to excavators (including rock hammering equipment), concrete trucks and pumps, concrete vibrators, mobile cranes, elevated work platforms, loaders, rail tamper, hammer drill, rail grinder, hi-rail vehicles, generators, lighting towers, milling machine, paver, water cart, light and heavy vehicles, tippers, dump and delivery trucks, hand-held and electric tools, demolition and road saws, jack hammers, power drills, vacuum truck, asphalt paver, welding equipment, rail and circular saws and compaction equipment including a roller.
- The project team will take every step possible to minimise noise impacts, however some of this work will be noisy. A range of measures are in place to reduce noise and meet the project's approval conditions, including noise barriers, using only the necessary equipment for each task, turning off equipment when not in use and equipping machinery with non-tonal movement alarms.
- Some construction and testing activities will take place **at night and on weekends**, depending on the program schedule and worker safety considerations.
- Some equipment may be transported outside of standard construction hours in line with Transport for NSW requirements for transporting oversized vehicles.
- Access to buildings and driveways will be maintained at all times.
- We will park our vehicles along the rail corridor where possible however, please be aware that on-street parking may be limited near worksites, particularly during planned rail possessions.
