

Monthly update – Clyde and surrounds

25 May 2026

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, link new communities to rail services and support employment growth and housing supply.

Gamuda Australia and Laing O'Rourke Consortium (GLC) has been awarded the contract to deliver nine kilometres of twin metro rail tunnels between Westmead and Sydney Olympic Park, excavation for two new metro stations, a stabling and maintenance facility at Clyde and a precast facility at Eastern Creek.

Sydney Metro has engaged Quickway Construction Pty Ltd to install high voltage (HV) conduits to the Rosehill Services Facility, part of the stabling and maintenance facility.

John Holland has been appointed to deliver the Linewide package, including 60km of track across the Sydney Metro West network, installation of rail systems and construction of the stabling and maintenance facility.

Construction activities: June 2026

Major construction will continue at Clyde during June.

What work we are doing?

- Installation and decommissioning of utilities and support work for the mainline tunnels, junction caverns and service tunnels at Clyde Dive*.
- Geotechnical and site investigations, including groundwater monitoring, surveying, and locating and relocating existing utility services within the site and nearby streets.
- Ongoing work within the road corridor, including utility upgrades on James Ruse Drive and Unwin, Shirley, Wentworth, Martha, Colquhoun and Devon streets.
- Delivery and removal of machinery, equipment and materials, including spoil stockpiling*.
- Installation, monitoring and removal of survey equipment along the alignment until mid-2026*.
- Establishment of site and workforce facilities, plus ongoing site and tunnel operation, maintenance and upkeep of tunnels and site.

Work will be conducted during standard working hours, **7am – 6pm Monday to Friday, 8am – 6pm, Saturdays.**

*Tunnelling support activities, and some construction activities will be **24 hours, seven days a week.** Work activities are subject to ground and weather conditions and may be rescheduled if required. We will notify you via our email updates if this occurs.

Night work – M4 and James Ruse Drive

Jet cleaning and CCTV investigations of stormwater and roads will be undertaken on the Western Motorway (M4) and James Ruse Drive on-ramp between Wentworth Street and Deniehy Street.

This work will require a temporary eastbound on-ramp closure and overnight lane closures on the M4 mainline on the following dates:

- **8pm Monday 1 June to 5am Tuesday 2 June 2026,**
- **8pm Tuesday 2 June to 5am Wednesday 3 June 2026,**
- **8pm Wednesday 4 June to 5am Thursday 5 June 2026,**
- **8pm Thursday 5 June to 5am Friday 6 June 2026.**

Quickway – Power Enabling Work

Work to install HV conduits from the Endeavour Substation on Colquhoun Street to the Rosehill Services Facility on Unwin Street will continue during June. Activities include excavating trenches in the road and installing conduits

Most of this work will take place out of hours, **from 6pm to 5am Monday to Friday,** to minimise traffic impacts. Some work may also be undertaken during standard construction hours, **7am to 6pm Monday to Friday.**

For more information, please refer to Quickway's dedicated notification available on our website <https://www.sydneymetro.info/station/clyde-stabling-and-maintenance-facility> **What to expect:**

- Use of noise blankets during night work, where possible to minimise disturbance
- Directional lighting to reduce impact on nearby properties
- Noise, vibration and dust monitoring
- Traffic controls, including contraflow, boom gates, temporary barriers, and stop-slow traffic
- Increased worker presence and vehicle movements on Colquhoun, Unwin and Shirley streets

Equipment used (but is not limited to): cranes, generators, bolting rigs, trucks and dogs, light vehicles, drill rigs, dust scrubbers, compressors, excavators (including attachments), dozers, jackhammer, concrete agitators, concrete pumps, vacuum trucks, vibratory roller, chainsaws, mulchers, chippers, road saw, traffic control devices and survey equipment.
